#### President and Members of the Retirement Board School Employees Retirement System

Dear President and Members:

The comprehensive annual financial report of the School Employees Retirement System (SERS) is submitted herewith. This report contains statements of financial condition, results of operation of the benefit programs administered by the SERS, schedules of significant data regarding the operation of the Retirement System, and the opinion of our certified public accountant, Peat, Marwick, Mitchell and Co. In addition, there is an Actuarial Section containing the opinion of our independent actuary, Gabriel, Roeder, Smith and Co., an Investment Section containing the investment report, schedules of portfolio activity, and a listing of our portfolio, and the Plan Summary.

#### Accounting System and Reports

This report was prepared in accordance with generally accepted accounting principles of governmental accounting and reporting as pronounced by the National Council of Governmental Accounting.

Transactions of the SERS are reported on the accrual basis of accounting. Our internal accounting controls are designed to insure the safekeeping of member contributions and to provide a reasonable degree of reliability regarding all of our financial records. During the past year we made a significant modification to our cash management system which allows us to deposit and subsequently invest cash receipts on a more timely basis. These cash receipts are treated as undistributed deposits until such time as they are allocated to member contributions, employer contributions, or investment income.

#### Review of Operations

In early 1985, the SERS undertook to develop a Long-Term Business Plan. In accordance with our mission of "Providing the Best Possible Benefits and Service to the Members and Retirants of the School Employees Retirement System," a document was prepared which forecasted a number of challenges to the System which must be addressed in the next few years, analyzed our ability to meet those environmental forces, and proposed several key goals and objectives to be achieved by our actions during those years.

In March, Board President Mary Kasunic was re-elected to a four-year term expiring in 1989. During her previous sixyear tenure, Mrs. Kasunic served as Vice President for one year and President for two years.

Continuing efforts at effective cost management of the SERS health care program for retirees led to several changes in the plan. The maximum lifetime benefit under the Aetna program was increased from \$500,000 to \$1 million; the annual deductible went from \$100 to \$150 per person; and the retiree cost for each drug prescription was raised from \$1.00 to \$2.00.

On the federal front, there were renewed efforts to require all public employees to join Social Security. Another proposal would institute a tax on school employees and employers to pay for Medicare coverage. Although mandatory Social Security coverage did not develop as a serious proposal, Congress was still considering mandatory Medicare coverage as of the date this report was prepared.

#### Financial Highlights

#### Revenues:

Revenues from employee and employer contributions were \$73.1 million and \$119.1 million, respectively, while income from investments totaled \$153.9 million. This represents an increase over 1984 of 8.3% for employee contributions, 11.5% for employer contributions, and 6.0% for investment income. Contribution rates for both employees and employers remained unchanged from the prior year.

#### Expenses:

Expenses are incurred primarily for the purpose for which the Retirement System was created; namely, the payment of benefits. Included in the total expenses for fiscal 1985 were benefit payments, refunds of contributions due to member termination or death, transfers of contributions to other Ohio Systems to provide benefits for those members who hold membership in more than one system, and administrative expenses. Expenses for fiscal 1985 totaled \$162.3 million, an increase of 10.9% over 1984 expenses. Increases in the number of benefit recipients, the average benefit paid, and health care expense combined to increase benefit expense by \$15 million, accounting for nearly all of the increase in total System expenses for the fiscal year.

#### Financial Highlights (Continued)

Funding and Reserves:

Funds are derived from the excess of revenues over expenses, and are accumulated by the Retirement System in order to meet current and future benefit obligations to retirees and beneficiaries. The higher the level of funding, the larger the accumulation of assets and the greater the investment income potential.

Net income for the fiscal year 1985 resulted in an increase in fund balances of \$186.9 million. This increase is \$10.7 million greater than the total increase in fund balances for the fiscal year 1984.

The actuarial valuation, for funding purposes, dated June 30, 1985 reflects an unfunded accrued liability of \$1,402 million. This liability represents the difference between the computed actuarial accrued liability for benefits to be paid members and retirants (\$3,086 million) and total of fund balances and expected value of future payments for state subsidies (\$1,684 million). The current employer contribution rate of 14% is sufficient to amortize this unfunded accrued liability over 36 years. A year ago, the funding period was 37 years.

Additional information regarding funding is provided within the Actuarial Section (pages 24 to 26 of this report).

#### Investments

The School Employees Retirement System invests the previously mentioned funds in order to maximize both current income yield and long-term appreciation. For the fiscal year ended June 30, 1985, investments provided 44.1% of the System's total revenues while employee and employer contributions provided 20.9% and 34.1%, respectively; and other sources accounted for the remaining 0.9%.

At June 30, 1985, our investment portfolio was structured as follows: 51.6% in debt securities; 24.4% in equity securities; 12.7% in short-term investments; and 11.3% in real estate.

Portfolio composition, rates of return, and analysis of significant economic conditions, and additional information concerning our investments are presented in the Investment Section (pages 27 to 49).

#### Acknowledgments

The preparation of this report is the result of the combined effort of the System's staff under the direction of the Retirement Board. It is intended to provide complete and reliable information as a basis for making management decisions, to disclose compliance with legal provisions, and as a means of determining responsible stewardship for the assets contributed by the members and their employers.

This report is being mailed to all employer members of the System and other interested parties.

Respectfully submitted,

Thomas R. Anderson
Executive Director

John W. Frank

Assistant Director, Membership and Accounting

### Financial Statements

Peat, Marwick, Mitchell & Co. Certified Public Accountants Two Nationwide Plaza Columbus, Ohio 43215 614-221-3181

Honorable Thomas E. Ferguson Auditor of State State of Ohio

The Retirement Board School Employees Retirement System of Ohio:

We have examined the balance sheets of the School Employees Retirement System of Ohio as of June 30, 1985 and 1984 and the related statements of revenues, expenses and changes in fund balance and changes in financial position for the years then ended. Our examinations were made in accordance with generally accepted auditing standards and, accordingly, included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

In our opinion, the aforementioned financial statements present fairly the financial position of the School Employees Retirement System of Ohio at June 30, 1985 and 1984 and the results of its operations and the changes in its financial position for the years then ended, in conformity with generally accepted accounting principles applied on a consistent basis.

Our examinations were made for the purpose of forming an opinion on the basic financial statements taken as a whole. The supplementary information included in Schedules I through IV is presented for purposes of additional analysis and is not a required part of the basic financial statements. Such information has been subjected to the auditing procedures applied in the examinations of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

Peat, Marnick, Mithell's Co.

November 11, 1985

#### NOTES TO FINANCIAL STATEMENTS June 30, 1985 and 1984

#### (1) Description of the System

(A) Organization - The School Employees Retirement System of Ohio (SERS) was established by the Ohio General Assembly in 1937 to provide retirement benefits to employees of Ohio public schools who are not required to possess a certificate in order to perform their duties. Responsibility for the organization and administration of SERS is vested in the Retirement Board. Employer and employee membership data follow:

|                         | June   | 30,    |
|-------------------------|--------|--------|
| Employer Members        | 1985   | 1984   |
| Local                   | 376    | 376    |
| City                    | 192    | 192    |
| County                  | 86     | 87     |
| Village                 | 49     | 49     |
| Vocational              | 49     | 49     |
| Technical               | .13    | 13     |

| Other                   | 1      |        |
|                         | 768    | 769    |
| Employee Members        |        |        |
| Current retirants       |        |        |
| and beneficiaries       | 38,708 | 36,838 |
| Inactive vested members | 7,597  | 7,467  |
| Active plan members:    |        |        |
| Vested                  | 54,159 | 51,743 |
| Nonvested               | 32,679 | 33,018 |
| Total active            |        |        |
| plan participants       | 86,838 | 84,761 |
|                         |        |        |

(B) Benefits: Members are eligible for normal retirement benefits upon reaching age 65 and earning 30 years of service credit. The benefit is equal to 2% of the member's final average salary, as defined, multiplied by the number of years of credited service. Early retirement with reduced benefits is available upon reaching (a) age 55 and 25 years of service credit or (b) age 60 and 5 years of service credit.

In addition to retirement benefits, SERS also provides for disability benefits, survivor benefits, death benefits and health care benefits. Members are eligible for disability benefits after completion of 5 years of eligible service. Qualified dependents of a deceased member are eligible for monthly survivor benefits. Death benefits of \$500 are payable upon the death of a retirant to a designated beneficiary. All members receiving a benefit from SERS are eligible to receive medical insurance. Members who retire after June 1, 1986 must have at least 10 or more years of service credit to qualify for the health care benefits.

Members with credited service in the State Teachers Retirement System (STRS) or Public Employees Retirement System (PERS) are eligible to receive transferred credit from either or both of those systems. Any service which is not concurrent with service within SERS will be included in the determination of retirement benefits. Similarly, a member with credited service in SERS may transfer such service to STRS or PERS upon retirement.

Upon termination of a member's school employment, the member's accumulated contribution, without interest, is refundable.

(C) Contributions - The Ohio Revised Code requires contributions by active members and their employers. Contribution rates are established by the Retirement Board within the allowable rates established by the Ohio Revised Code. Active members and their employers are required to contribute 8.75% and 14%, respectively, of active member payroll. An Employees' Saving Fund (Account) is established for member contributions. Contributions may be refunded to a member who withdraws from SERS or to the member's beneficiary following the member's death.

#### (2) Summary of Significant Accounting Policies

The following are the significant accounting policies followed by SERS.

(A) Investments - Income on all investments is recognized on the accrual basis.

Corporate and government bonds and obligations with fixed maturities are reported at cost (as of the trade date) adjusted for amortization of premiums and accretion of discounts.

Investments in residential mortgage-backed securities are carried at the amount of unpaid principal balance of the securities, adjusted for accretion of discounts.

Investments in first mortgage loans are carried at the amount of unpaid principal balance of the loan.

Investments in common stocks are carried at cost. Gains and losses on stock sales are recognized on the basis of the average cost of the stocks sold.

Net option income is earned on premiums received from selling covered call stock options. Premiums received are earned ratably over the term of the option or until the option is exercised, closed, or expired.

Investments in short-term obligations, principally certificates of deposit, commercial paper, U.S. Treasury bills and bank repurchase agreements are carried at cost, which approximates market value.

Investments in real estate are carried at cost. Depreciation on buildings is provided using the straight-line method over the estimated useful lives of the property (40 to 45 years).

- **(B) Depreciation (Non-Investment)** Depreciation is provided using the straight-line method over the estimated useful lives of the related assets.
- (C) Federal Income Tax Status During the years ended June 30, 1985 and 1984 SERS qualified under the

School Employees Retirement System Of Ohio

# NOTES TO FINANCIAL STATEMENTS (Continued) June 30, 1985 and 1984

provision of the Internal Revenue Code and was exempt from Federal income taxes.

**(D)** Accrued Health Care Benefits Payable - Amounts accrued for health care benefits payable are based upon estimates furnished by the claims administrator. Such estimates have been developed from prior claims experience.

#### (3) Actuarial Cost Method and Assumptions

Employer contribution rates are determined using the entry age normal actuarial cost method. This method produces an employer contribution rate consisting of (1) an amount for normal cost (the estimated amount necessary to finance benefits earned by employees during the current service year), and (2) the amount for amortization of the unfunded actuarial accrued liability as of June 30, 1985 over 36 years.

The following significant assumptions were used in the actuarial valuations as of June 30, 1985 and 1984: (1) a rate of return on the investments of 7.5% compounded annually; (2) projected salary increases of 4.5%, compounded annually, attributable to inflation; (3) additional projected salary increases ranging from .5% to 3% per year attributable to seniority and merit; (4) post-retirement mortality life expectancies of participants based on the 1955 American Annuity Table set ahead 1 year for men and set back 5 years of women; (5) rates of withdrawal from active

service before retirement for reasons other than death, rates of disability and expected retirement ages developed on the basis of actual plan experience; (6) health care premium increases of 4.5% annually with 25% of eligible retirants electing a joint survivor form of payment and 25% of eligible retirants electing to cover spouses for health care; and (7) eligibility of all health care benefit recipients for Medicare on attainment of age 65, or immediately if retired for disability.

### (4) Funding Requirement Determinations and Actual Contributions

Included in employer contributions were \$112,592,000 and \$103,229,000 for 1985 and 1984, respectively, equivalent to 14 percent of active member payroll for 1985 and 1984 of \$804,230,000 and \$737,348,000, respectively. Amounts contributed by employers were in accordance with actuarially computed funding requirement determinations.

The components of employer contributions are as follows: (1) \$50,666,000 and \$46,453,000 (6.3 percent of active member payroll) for normal costs in 1985 and 1984, respectively, and (2) \$61,926,000 and \$56,776,000 (7.7 percent of active member payroll) for amortization of the unfunded actuarial accrued liability in 1985 and 1984, respectively.

#### (5) Investments

A summary of investments as of each June 30 follows:

|                           |    |           | <br>            |

### (8) Actuarial Present Value Of Credited Projected Benefits

For financial reporting purposes, pursuant to National Council on Governmental Accounting Statement 6, the actuarial present value of credited projected benefits has been computed and included in these financial statements. The actuarial present value of projected benefits consists of:

(A) the actuarial present value of projected benefits payable to current retirants and beneficiaries

- (B) the actuarial present value of projected benefits payable to terminated vested participants and
- (C) the actuarial present value of credited projected benefits for active participants.

The actuarial present value of credited projected benefits for active participants represents a portion of the actuarial present value of projected total benefits, giving effect to estimated salary increases to date of retirement. The portion assumed to be credited is the portion represented by the ratio of:

- (A) the number of years of covered service rendered as of the date of the valuation to
- (B) the total covered service which will have been rendered as of the expected date of retirement.

The actuarial present value of credited projected benefits and the unfunded portion thereof reported in these financial statements differ from the actuarial accrued liability and the unfunded portion thereof developed for funding requirement determinations because different actuarial cost methods are used for the two purposes.

The total actuarial present value of credited projected benefits were \$2,913,480,931 and \$2,636,240,463 at June 30, 1985 and 1984, respectively, consisting of:

#### CHANGES IN FUND BALANCE ACCOUNTS

Schedule IV

Description of Funds (Accounts)

Chapter 3309 of the Ohio Revised Code requires the following funds to be maintained by SERS:

#### (A) Employees' Savings Fund

The Employees' Savings Fund accumulates the contributions deducted from the compensation of members. Contributions may be refunded to a member who withdraws from SERS or to the member's beneficiary, following the member's death. Upon retirement, a member's accumulated contributions are transferred to the Annuity and Pension Reserve Fund.

#### (B) Employers' Trust Fund

The Employers' Trust Fund is the depository for employer contributions. Based on actuarial valuations, amounts are transferred out of this fund into the Annuity and Pension Reserve Fund and the Survivors' Benefit Fund.

#### (C) Annuity and Pension Reserve Fund

The Annuity and Pension Reserve Fund is the fund from which all retirement, health care and death benefits are

paid. Funds are transferred into the Annuity and Pension Reserve Fund from the Employees' Savings Fund and Employers' Trust Fund. In addition, contributions by the State of Ohio for supplemental benefits are recorded in this fund.

#### (D)Survivors' Benefit Fund

The Survivors' Benefit Fund represents amounts transferred from the Employees' Savings Fund and the Employers' Trust Fund for the payment of survivors' benefits.

#### (E) Guarantee Fund

The Guarantee Fund records all investment earnings of SERS. Annually, investment earnings are transferred to the Annuity and Pension Reserve Fund, the Survivors' Benefit Fund, and the Expense Fund.

#### (F) Expense Fund

The Expense Fund is used to record all expenses for the administration and management of SERS. Annually, funds are tranferred from the Guarantee Fund to cover expenses incurred.

#### **Unfunded Actuarial Accrued Liabilities**

Each time a new employer joins the System or an employer adopts a higher level of benefit, unfunded liabilities are created. The law governing the System requires that these additional liabilities be financed systematically over a period of future years.

In an inflationary economy, the value of dollars is decreasing. This environment results in employee pays increasing in dollar amounts, retirement benefits increasing in dollar amounts, and then, unfunded actuarial accrued liabilities in-

creasing in dollar amounts — all at a time when the actual substance of these items may be decreasing. Looking at just the dollar amounts of unfunded actuarial accrued liabilities can be misleading. Unfunded actuarial accrued liabilities dollars divided by active employee payroll dollars provides an index which helps understanding. The smaller the ratio of unfunded liabilities to active member payroll, the stronger the system. Observation of this relative index over a period of years will give an indication of whether the system is becoming financially stronger or weaker.

## COMPARATIVE SUMMARY OF ACCRUED LIABILITIES PERCENTAGE COVERED BY NET ASSETS AVAILABLE FOR BENEFITS

**NOTE:** The ultimate test of financial soundness is the Systems' ability to pay all promised benefits when due. The Systems' progress in accumulating assets to pay all promised benefits can be measured by comparing the present assets of the System with (1) member contributions, (2) the liability for future benefits payable to current retirants and beneficiaries, (3) the employer-financed portion of the liability for benefits payable to active plan participants.

In a System that has been following the discipline of level

percent of payroll financing, the liabilities for active member contributions on deposit (1) and the liabilities for future benefits to present retired lives (2) will be fully covered by present assets (except in rare circumstances). In addition, the liabilities for service already rendered by active members (3) will be partially covered by the remainder of present assets. The larger the funded portion of liability (3) the stronger the condition of the System. Liability 3 being fully funded is rare.

**NOTE:** NCGA Statement 6, the authoritative guide to the preparation of this report, requires that we present 10 years of comparative actuarial statistical data, disclosing the progress we have made in accumulating assets to pay benefits when due. Tables I to III present only 5 years of data, since 10 years is not available.

NCGA Statement 6 also states that "... Until 10 years of ac-

tuarial present value of credited projected benefits data become available, the data which are available should be disclosed." In Tables I to III the entry age normal actuarial cost method was used to determine the actuarial liability. The entry age normal actuarial cost method is the same method used to determine employer and employee contribution rates.

## THOMAS E. FERGUSON AUDITOR OF STATE

COLUMBUS, OHIO 43216

DEPUTY AUDITORS:

JAMES A. BOLDEN Administration

RICHARD G. NUSS CPA Auditing Division

RUSSELL ROUCH Management Advising Service School Employees Retirement System 45 North Fourth St. Columbus, Ohio 43215

We have reviewed the report of examination of the School Employees Retirement System for the period ended June 30, 1985, prepared by Peat, Marwick, Mitchell & Co., Certified Public Accountants. Based upon this review, we have accepted this report in lieu of the examination required by Section 117.09 of the Revised Code. The Auditor of State has not examined the accompanying financial statements, and accordingly, is unable to express an opinion on them.

Our review was made in reference to the applicable sections of legislative criteria as reflected by the Ohio Constitution; the Revised Code; policies, procedures and guidelines of the Auditor of State; and local resolutions/ordinances.

2090 First National Building Detroit, Michigan 48226 Area 313: 961-3346

November 26, 1985

The Retirement Board School Employees Retirement System of Ohio Columbus, Ohio

The basic financial objective of SERS is to establish and receive contributions which, expressed as percents of active member payroll, will remain approximately level from generation to generation of Ohio citizens.

In order to determine SERS present financial position and level contribution rates for the future, annual actuarial valuations are made.

The latest completed actuarial valuation is based upon data and assumptions as of June 30, 1985. Conditions and results are shown in our reports.

Assumptions concerning future financial experiences are needed for an actuarial valuation. We believe the assumptions used in the regular annual valuations produce results which are reasonable.

On the basis of the 1985 valuation and the benefits and contribution rates then in effect, it is our opinion that SERS is in sound condition in accordance with actuarial principles of level cost financing.

In the last decade two economic assumptions were trouble spots.

The investment return rate did not exceed the inflation rate by a reasonable amount (3% annually is the current assumed margin for the future). However, a substantial real rate of return has been available in the investment universe in recent years.

Increases in retired life health care costs substantially exceeded overall inflation increases. Health care costs, expressed as a percent of employee payroll, are higher for SERS than for most other retirement systems, because of a relatively low average employee pay in SERS.

A program of annual actuarial gain/loss analysis has begun; this analysis determines the relationship between assumed financial experience and actual experience, for each major risk area.

Respectfully submitted,

Gerald B. Sonnenschein Richard G. Roeder

## STATEMENT OF ACTUARIES (Valuation as of June 30, 1985)

The assumptions used for the actuarial valuation were adopted by the Retirement Board after consulting with the actuary, and a summary follows.

The non-economic assumptions are from the June 30, 1980 revised actuarial valuation and the economic assumptions were established for the June 30, 1981 actuarial valuation.

- 1) The investment return rate used in making the valuation was 7.5 percent per year, compounded annually (net after administrative expenses). The real rate of return is the portion of total investment return which is more than the inflation rate. Considering inflation recognition of 4.5 percent, the 7.5 percent investment return rate translates to an assumed real rate of return of 3 percent.
- 2) Pay increase assumptions for individual active members are shown for sample ages in the table below. Part of the assumptions for each age is for merit and/or seniority increase, and the other 4.5 percent recognizes inflation.

|  | INC | REASE | NEXT | YEAR |
|--|-----|-------|------|------|
|--|-----|-------|------|------|

| Merit &<br>Seniority | Base<br>(Economy)         | Total   |
|----------------------|---------------------------|---|
| 3.0%                 | 4.5%                      | 7.5%  |
| 2.3                  | 4.5                       | 6.8   |
| 1.8                  | 4.5                       | 6.3   |
| 1.0                  | 4.5                       | 5.5   |
| 0.0                  | 4.5                       | 4.5   |
|                      | 3.0%<br>2.3<br>1.8<br>1.0 | Seniority         (Economy)           3.0%         4.5%           2.3         4.5           1.8         4.5           1.0         4.5 |

3) Total active member payroll is assumed to increase 4.5 percent annually, which is the portion of the individual pay increase assumptions attributable to inflation. The number of active members is assumed to continue at the present number.

 Assumptions for Health Care Coverages Premium Rates:

| Status   | Month    | nly Rates<br>1985 | Reported<br>1984 |
|--|----------|-------------------|------------------|
| Benefit Recipient below a                            | ige 65 🖇 | § 148.10          | \$ 148.10        |
| Spouse below age 65*                                 |          | 81.09             | 81.09            |
| Benefit recipient above a<br>and eligible for Medica |          | 35.63             | 35.63            |
| Spouse above age 65 ar<br>eligible for Medicare*     | nd       | 11.03             | 11.03            |
| Mail order prescription se                           | ervice   | 11.24             | 8.83             |
| * System portion                                     |          |                   |                  |

**Availability of Medicare Coverage:** All benefit recipients were assumed to be eligible for Medicare on attainment of age 65, or immediately if retired for disability.

**Election of Joint and Survivor Benefits:** 25% of eligible retirants are assumed to elect a joint and survivor form of payment. Survivors of these retirants will receive fully paid health care for the remainder of their lives.

Election of Spouse Health Care Coverage: 25% of retirants are assumed to elect to cover spouses for health care. The System will pay approximately one-half the premium for dependents during the life of the retirant.

Medicare Part B Premium: \$16.20 per month assumed to be effective January 1, 1985, from \$15.50.

**Premium Increases:** Premiums are assumed to increase 4.5% annually, which is the inflation rate assumed for other actuarial valuation computations.

Actuarial

#### **Actuarial Accrued Liabilities**

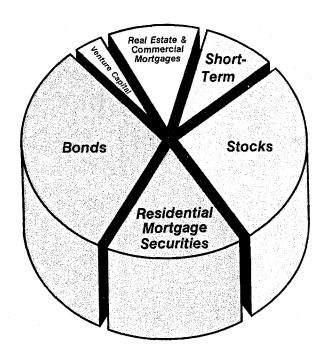

Accrued liabilities are the present value of plan promises to pay benefits in the future, based upon service already rendered. A liability has been established ("accrued") because the service has been rendered, but the resulting monthly cash benefit may not be payable until years in the

future. Accrued liabilities are the result of complex mathematical calculations, which are made annually by the plan's actuaries—specialists who make such calculations. The results of the computed actuarial accrued liabilities, computed using the entry age normal actuarial cost method, are listed in the following schedule.

#### Actuarial Accrued Liabilities June 30, 1985

INVESTMENT REPORT Investments

The U.S. economy was a little weaker during the past year than was expected. The U.S. Gross National Product increased by only 2% during the fiscal year instead of the 4% which was anticipated. Part of the reason for this slow growth was the strength of the U.S. dollar versus foreign currencies during the period. This strength in the dollar caused U.S. goods to be very expensive for foreigners while making foreign goods relatively cheap for U.S. citizens. This strength resulted in a large trade deficit and contributed to the low growth rate of the U.S. economy. The U.S. inflation rate continued at a low level and was slightly under 4% for the fiscal year. The unemployment rate stabilized in the 7 to 7½% range and finished the fiscal year at 7.3%.

The slow growth rate of the U.S. economy and the low inflation rate allowed both the fixed-income markets and the stock market to report excellent rates of return for the year. The fixed-income markets returned from 28% to 41% depending on the length of maturity, and the S & P 500 index of common stocks returned 30.9% for the fiscal year. However, because of the uncertainties surrounding the federal budget, the proposed tax bill and the outlook for the U.S. economy and the dollar, both markets experienced a great amount of volatility during the year. Unfortunately many of the uncertainties in the markets last year are still present and unresolved. The budget deficit has not been reduced, and probably will not be reduced significantly during the near future, since President Reagan opposes a tax increase and Congress opposes significant cuts in spending.

The U.S. economy slowed dramatically during the first half of 1985 and does not give any indication of picking up for the second half. Because of this weakness in the economy, the Federal Reserve Board may be forced to continue its accommodative posture to prevent a recession. However, at the first sign of strength in the economy the Fed will probably become more restrictive to prevent the possible return of inflation. Because of these uncertainties, it is expected that both the fixed-income and stock markets will continue to remain very volatile during the coming fiscal year. It is expected that the next fiscal year will be somewhat stronger than last year. GNP should increase by approximately 4%, inflation should continue in the 4% to 5% range, and unemployment should remain in the 7% to 7½% range.

In light of the outlook for the U.S. economy it is anticipated that much of the coming year's cash flow will again be in-

vested in common stocks and, to a lesser extent this year, in real estate.

Over the past year approximately \$80 million was committed to real estate and participating mortgages. This increased the percentage of the Fund invested in these types of assets to 16.4% of the Fund as compared to 13.1% last year. This part of the Fund has experienced significant growth in size over the last three or four years; however, it is expected that these significant commitments of new cash to these types of assets will decline during the coming year. On June 30, 1986 it is anticipated that these assets will represent approximately 17% of the total Fund.

Emphasis will continue to be given to the stock portfolio during the coming year since the longer term economic outlook remains favorable. Since the stock market has been trending upward for the last two years, it is anticipated that stock prices might decline early in the year 1986 which will present an excellent buying opportunity. Therefore, near-term the Fund will take a more defensive posture with the intention of buying stocks after the expected weakness has occurred. At year-end June, 1986 it is expected that stocks will represent approximately 32% of the Fund as opposed to 24% currently.

Because of the continued rapid growth of the real estate and the common stock portfolios during the past year, the percentage of total assets held in the bond portfolio decreased from 32% to approximately 27% of the Fund at year-end. With the expected emphasis on common stocks in the coming year, it is anticipated that the percentage of bonds will decrease again; and by year-end bonds will probably represent only 22% of total assets of the Fund.

The mortgage portfolio decreased in size modestly last year, going from approximately 21% to around 19%. However, with the superior returns historically received on mortgage investments, and with their high quality and marketability, it is anticipated that the commitment to mortgages will increase modestly over the coming year to approximately 20% of the Fund.

The yields on the bond and mortgage portfolios are still very high and contribute a significant amount of income to the Fund each year. The yield on the bond portfolio increased again this year to 11.54% from 11.15% at last year-end. The yield on the mortgage portfolio is still at a very high 12.05% as compared to 12.10% last year at this time.

| Equity Portfolio                | 24.2%    | 22.6%      |      | 15.8% |
| Bond Portfolio                  | 34.5     | 23.2       |      | 13.3  |
| Residential Mortgage Portfolio  | 35.5     | 23.8       |      | 14.1  |
| Short-Term Investment Portfolio | 9.5      | 9.6        |      | 11.9  |
| Total Fund                      | 25.3%    | 20.1%      |      | 12.9% |

**NOTE:** Real Estate Portfolio returns are included in the total return of the Fund for each period; and for the last five years these assets have returned 12.9% annually.

#### **QUALITY OF STOCKS**

Schedule III

| Percent of Stock |
|------------------|
| 26.3%            |
| 27.1             |
| 20.6             |
| 15.0             |
| 7.8              |
| 1.8              |
|                  |
| <del></del>      |
| 1.4              |
|                  |

Of the stocks owned by the System, the majority fall within the top four quality grades as rated by Standard and Poor's Corporation with respect to the relative stability and growth of earnings and dividends. The 1.4 percent in the non-rated category are banks and insurance companies which are not rated by Standard and Poor's as a matter of policy.

| A + Highest       | B Below Average     |
|-------------------|---------------------|
| A High            | B – Low             |
| A - Above Average | C Lowest            |
| B + Average       | D In Reorganization |

#### **DIVERSIFICATION OF STOCKS**

Schedule IV

| Category                        | Percent |
|---------------------------------|---------|
| Credit Sensitive                | 18.6%   |
| Growth Consumer                 | 13.0    |
| Consumer Staple                 | 8.8     |
| Consumer Cyclical               | 13.4    |
| Intermediate Goods and Services | 29.2    |
| Capital Goods                   | 17.0    |

The System's stocks are diversified by industry to reduce risk and to enable the portfolio to participate in upswings in various sectors of the economy as they arise.

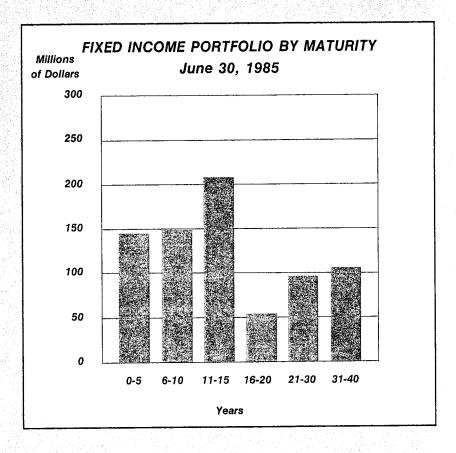

#### **DIVIDEND GROWTH FROM STOCKS**

Schedule V

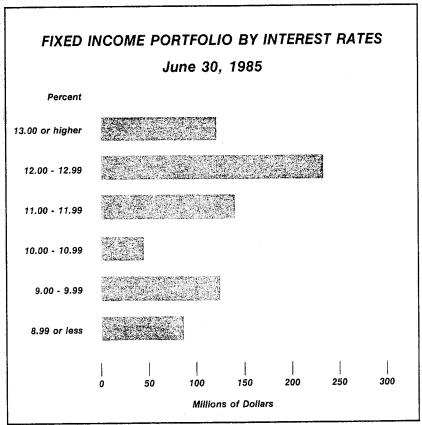

| Fiscal Year Ended | Dividends Received* | % Increase |
|-------------------|---------------------|------------|
| June 1985         | \$ 17,328,134       | + 16.7%    |
| June 1984         | <i>14,845,9</i> 87  | + 12.6     |

INVESTMENT POLICY Investments

This Investment Policy was adopted by the School Employees Retirement Board Of Ohio at its August 2, 1985 meeting.

#### A. Purpose

The purpose of this Statement of Investment Policy is to define the Retirement Board's investment philosophy and objectives for the School Employees Retirement System of Ohio. This statement sets forth policies and describes the organization and division of responsibilities to prudently implement the Board's philosophy and objectives in accordance with Section 3309.15 of the Ohio Revised Code. It also establishes the framework and specific objectives to monitor investment performance and promote effective communication between the Board and the Investment Staff and Investment Managers.

The contents of this Statement of Investment Policy and the associated Guidelines and Objectives are subject to change at any time by the Board. The Statement will be reviewed and revised periodically to assure that it continues to reflect the attitudes, expectations and objectives of the Board.

### B. Background

The School Employees Retirement System of Ohio was established by the state legislature to provide retirement and disability benefits for all non-certificated persons employed by the state's school districts. This purpose is sustained by the member and employer contributions and returns realized from investment of those contributions.

The System is governed by a seven member board, including the Ohio Attorney General and Auditor of State, with responsibility for the investment function as set forth in the Ohio Revised Code. In addition to the investment function, the Ohio Revised Code also sets forth the fiduciary responsibility of the Board and of other fiduciaries in discharging their duties with respect to the fund. This Statement of Investment Policy incorporates and is subject to all restrictions, guidelines and obligations set forth by the Ohio Revised Code.

# C. Investment Philosophy

#### Risk Posture

The Board realizes that its primary objective is to assure that the Plan meets its responsibilities for providing retirement and other benefits. Therefore, it shall always act to assure that the level of investment risk in the portfolio shall be prudent and shall not jeopardize that primary objective.

#### Return

The Board believes, however, that over the long-term there exists a relationship between the level of investment risk taken and rate of investment return realized. The Board feels that assumption of a moderate level of risk associated with investments is reasonable and

justified in order to enhance potential long-term investment results.

#### Diversification

The Board seeks diversification by asset class and by investment approach and individual investments within asset classes to reduce overall portfolio risk.

### Liquidity Requirements

The System anticipates positive cash flow over the nearterm and intermediate-term. Liquidity, for the purpose of immediate and intermediate-term benefit payments, is therefore not a major consideration in the investment of funds for the foreseeable future.

# D. Investment Objectives

In defining investment objectives the Board seeks to enhance the investment returns of the fund in order to permit higher benefits and to achieve lower costs. Therefore, it adopts the following general investment objectives:

# Performance Objectives

- A. Maximize Total Return on Assets: Recognizing the System's obligations will increase as a result of inflation, to maximize the total return on assets available for the provision of benefits while operating in accordance with applicable regulatory restrictions and within prudent parameters of risk.
- B. Preservation of Principal: To protect the System from severe depreciation in asset value during adverse market conditions. This objective shall be attained by broad diversification of assets and by careful review of risks.
- C. Competitive Results: To achieve investment results competitive with those of the broad market and of similar funds. Long-term results shall be emphasized.

#### Risk

- A. Stability: While the Board seeks higher long-term investment results, it also seeks to avoid major fluctuations in year-to-year results.
- B. Risk Level: The Board seeks to maintain a reasonable degree of total portfolio risk, defined as that which would be experienced by similar retirement systems.

# Other

Ohio Investments: Where investment characteristics, including return, risk and liquidity, are equivalent, the Board will give careful consideration to investments which will have a positive impact on the economy of Ohio.

#### E. Implementation Approach

In order to monitor and control the activities within the investment function, the Board has reserved certain responsibilities for itself. It has also delegated certain responsibilities to the Investment Staff, to organizations serving as

INVESTMENT POLICY Investments

### E. Implementation Approach (Continued)

Investment Managers and, from time to time, to other consultants or advisors. These are enumerated in Section F, Investment Organization and Responsibilities.

In fulfilling its fiduciary duties, the Retirement Board employs a competent and qualified Investment Staff for the management of the major portion of portfolio assets. In those areas where specialized expertise is required, the Retirement Board employs the services of outside Investment Managers.

The Board has also established a reporting process for regular and timely review and evaluation of investment results. This is described in Section G, Review and Evaluation. Finally, the Board has adopted Investment Guidelines and Objectives for each asset class and each investment management accountability unit within those asset classes. These guidelines also specify long-term target ratios for asset allocations, as well as permissible ranges related to those target allocations. These guidelines and objectives are regularly evaluated and updated based on market conditions, investment results and the recommendations of the Investment Staff, Investment Managers and other consultants or advisors.

### F. Investment Organization and Responsibilities

Responsibilities of the Retirement Board

The Retirement Board recognizes its responsibility to ensure that the assets of the Plan are managed effectively and prudently, in full compliance with all applicable laws, and for the exclusive benefit of participants and beneficiaries. The Board believes it can best manage those responsibilities by delegating certain specific duties to others, as described below. In addition, the Board may designate certain of its members to act as an Investment Committee or a Subcommittee from time to time, and may delegate certain decision-making or fact-finding responsibilities to that committee or subcommittee.

Specific responsibilities of the Retirement Board or its Investment Committee or Subcommittee are as follows:

- A. Ensure that all fiduciaries comply with the Ohio Revised Code and any other applicable regulations and legislation.
- B. Establish investment policies, guidelines and objectives for the assets of the Plan and communicate them to the Investment Staff and Investment Managers.
- C. Appoint and discharge those with responsibility for managing the Plan's assets, including investment managers, consultants and any others involved.
- D. Request, receive and review reports from the Investment Staff and Investment Managers.

Responsibilities of the Investment Staff

The Investment Staff, headed by the Executive Director and the Assistant Director for Investments, shall accept the

following responsibilities. The Executive Director shall:

- A. Obtain necessary reports on the investment results of the Plan's assets on a timely basis as specified in Section G, Review and Evaluation.
- B. Retain any consultants or advisors deemed necessary or desirable for assistance in the investment of Plan assets, and for meeting his responsibilities.
- C. Oversee the investment function.

The Assistant Director for Investments shall accept the following responsibilities:

- A. Administer the policies, guidelines and objectives adopted by the Retirement Board of the School Employees Retirement System of Ohio in compliance with the relevant sections of the Ohio Revised Code.
- B. Inform and communicate to other Plan fiduciaries, including all Investment Managers, the requirements of the Ohio Revised Code and the policies, guidelines and objectives adopted by the Retirement Board, and monitor their compliance.
- C. Prepare annually an Annual Plan for the investment of the Plan's assets with recognition of the target asset mix ratios and the permissible ranges for asset allocation established by the Board.
- D. Implement the Annual Plan, exercising the judgments allowed by the Board as to the asset allocation ranges for that year.
- E. Report to the Board or its Investment Committee any intra-year changes in the Annual Plan or in the policy, guidelines or objectives which the Investment Staff deems desirable or which are recommended by an Investment Manager or other consultants or advisors.
- F. Oversee the activities of the Investment Staff.

Responsibilities of the Investment Managers

Each Investment Manager, including Investment Staff with respect to internally managed assets, shall accept the following responsibilities for the specified investment management accountability unit which it manages.

- A. Manage the assets within its control in compliance with the relevant sections of the Ohio Revised Code and with the policies, guidelines and objectives adopted by the Retirement Board.
- B. Exercise investment discretion within the guidelines and objectives specified, including decisions to buy, hold or sell securities based on the manager's current investment strategy and outlook, and compatible with such objectives.
- C. Inform the Retirement Board or the Investment Committee of any substantial changes in investment strategy, portfolio structure, value of assets, and of any organizational changes including that of ownership, affiliation, organizational structure, financial condition, or changes

# Responsibilities of the Investment Manager (Continued)

in professional personnel staffing the investment management organization.

- D. Prepare reports for the Board or Investment Committee prior to any scheduled meetings but at least on a quarterly basis.
- E. Recommend to the Board or Investment Committee any changes in policy, guidelines or objectives which the Investment Manager believes to be desirable.

#### G. Review and Evaluation

The Board shall review and evaluate periodic reports on the investment results of the Plan's assets, as described below, obtained by the Executive Director. In addition, the Board shall review the periodic reports of each Investment Manager. In these reviews, it is intended that greater emphasis shall be given to long-term results than to short-term results. Following is the intended frequency for the review and evaluation, although these may be altered by the Board as deemed necessary:

#### Quarterly

Summary Investment Reports — including highlights and commentary of investment performance, asset composition and holdings for each asset class and each investment management accountability unit. These reports shall identify any results which require the attention of the Board.

Investment Manager Reports — prepared by the manager of each investment management accountability unit, reporting on the results of the most recent period.

# Annually

Detailed annual investment reports — these reports will include the contents of the quarterly summary reports, as well as additional detail regarding the investment results for each investment management accountability unit.

Written and/or verbal reports presented by the manager of each investment management accountability unit. These shall be scheduled on a staggered basis throughout the year, as determined appropriate by the Board.

# **PLAN SUMMARY**

#### **Purpose**

The School Employees Retirement System of Ohio was established in 1937 by the state legislature to provide retirement and disability benefits for all non-certificated persons employed by the state's 768 school districts. This purpose is sustained by the member and employer contributions and the income realized from investments from those contributions.

#### Administration

The functioning of SERS is supervised by a seven member Board which works in conjunction with the System's Executive Director. Four of the seven Board members are elected by the general membership (those who contribute to SERS) and one is elected by retirants. The Ohio Attorney General and Auditor of State by virtue of their elected office, serve as the remaining two Board members in an ex officio capacity.

The Executive Director is appointed by the Board. This person oversees the administrative operation of the System, and is aided by seven assistant directors. Their areas of responsibility are accounting/membership, investments, office services, retirement services, information services, data processing, and planning/human resources.

### **Employer Participation**

The school employers served by SERS include public schools within the state's cities, villages and counties, as well as local districts, vocational and technical schools, and The University of Akron.

Employers contribute to SERS at the rate of 14.0% of payroll. Some employers pay the System directly on a monthly, quarterly, or annual basis, while others make payments through participation in the Ohio Department of Education's School Foundation Fund.

In addition to forwarding appropriate contribution amounts to SERS, it is the responsibility of the employers to supply SERS with new membership records, members' contribution information, and any data needed at the time of a member's application for benefits or refund of deposits on termination of employment.

## **Employee Participation**

Membership in SERS is divided into several groups based on the activity of a member's SERS account. Member groups are:

A. Active Members — These are persons currently employed by a school employer. Membership is required for anyone working in a position which does not require certification by the Ohio Department of Education. These persons include clerical workers, maintenance personnel, bus drivers, food service

workers, playground supervisors, data processing personnel, etc. There are two exceptions to the membership requirements: (1) Persons with student status within a school district may or may not choose to become members of SERS. (2) Persons retired from one of the other Ohio state retirement systems may not become members of SERS. A retired member may not be employed in the schools for 60 calendar days following the effective date of retirement. Thereafter, employment in the school cannot exceed 59 days of the fiscal year, beginning July 1. Active members have an amount equal to 8.75% of their earnings deducted from their gross salaries for each payroll period. These amounts are then forwarded to SERS by the payroll officer, and applied to the member's account at SERS.

- B. Inactive Members These are persons who have contributions on deposit with SERS, but who are not currently employed by a school district in the state of Ohio.
- C. Retired/Disabled Members These are persons who have either (1) met the age and service requirements for retirement from service; or (2) become eligible to receive benefits as a result of an injury or illness which prevents the member from performing regularly assigned duties.
- **D. Members' Survivors** When a member dies before retirement, the qualified beneficiaries become eligible for monthly benefits from SERS.

#### **Refund Of Contributions**

A member is entitled to a full refund of contributions with SERS upon termination of school employment. Only the money which the member has contributed is refundable. In accordance with Ohio Revised Code, there is a 90-day waiting period after the member's last day of service before the refund can be paid. A refund cancels any claim to benefits offered by SERS.

The refunded amount, plus interest, may be redeposited if, at some later date, the member returns to school service or to any other public service with the state of Ohio. This purchase may be made after the member has been credited with 1.5 years of contributing service.

#### Service Retirement

Members may retire from school employment if they have attained one of three combinations of age or service:

- 1. Five years of service and age 60, or
- 2. Twenty-five years of service and age 55-60, or
- 3. Thirty years of service at any age.

A member's age is defined to be the actual age a person

# PLAN SUMMARY

has reached on the day of retirement. Any change of the date of birth on our records must be substantiated by submitting proof of date of birth to the System.

#### Service Credit

Service credit is the actual number of years or fraction thereof which a person worked within a school district or districts in Ohio schools, plus any other free or purchasable service which the System recognizes.

Free service is service for which no contributions are required. This includes military service performed while on leave from the school district; service with a school system before establishment of SERS in 1937; or service granted for a period (three years or less) spent off the district's payroll while drawing state worker's compensation for a school job-related accident.

Purchased service is service for which payment plus interest is required. The interest rate is 7.5%. Service must be purchased before the date of retirement if it is to be considered in calculating the member's benefits. Payment may be made in a lump sum or in multiples of one month or more so long as the complete amount due is tendered before retirement. The types of service which can be purchased are:

Military — For service with the armed forces of the U.S. before July 1, 1973, a member may purchase up to 5 years of credit for time spent before working for a school employer or after leaving that employment. There is no restriction placed on the time elapsed between school employment and the time spent in the military. A member may purchase additional service credit if the military service includes prisoner of war time. Purchased credit may not be greater than the member's actual Ohio school employment credit.

Federal, Other State, Or Private Service — The member may purchase credit for service rendered in a school or government position other than the State of Ohio. The amount of service cannot be greater than the member's SERS service nor can it exceed 5 years.

**Refunded Service** — Service lost due to the payment of a refund may be restored after the member has returned to work and accrued 1.5 years of service covered by SERS, STRS, PERS, PFDPF, or SHPRS. An interest charge is payable in addition to the restored funds.

**Compulsory Service** — This is service for which the member should have made contributions while working, but did not, for whatever reason. The full amount, plus interest, must be paid before retirement benefits are granted.

**Optional Service** — This is service during a period when the member was given a choice of contributing or refraining from doing so. In order for the member to purchase this credit in this instance, the employer-school district

must likewise make its contribution, and the employer is under no obligation to do so.

**Leave Of Absence** — A member returning to work after a period of authorized leave may purchase service credit for the period involved. As with optional service, an employer contribution is required for this service to be granted, but the employer is under no obligation to make payment.

A member who has contributions not only at SERS, but also at State Teachers (STRS) or Public Employees (PERS) Retirement Systems is eligible to receive transferred credit from either or both of those systems. Any service which is not concurrent with (served at the same time as) SERS service will be included in determination of retirement benefits.

#### Early Retirement Credit

Employers may purchase up to five years of service credit for their eligible employees under an early retirement incentive plan authorized by 1983 legislation. Adoption of a plan is optional and only employers may purchase such credit.

### Benefit Calculation

The final average salary is the average of the member's highest three years of earnings while in the school service.

The benefit amount is calculated in this way:

The final average salary amount is multiplied by 2% to determine the value of a year of service credit. This value cannot be less than \$86.00. If it is, \$86.00 is used. The value is then multiplied by the number of years of service credit. This calculation yields the annual retirement benefit amount for a person who has reached age 65 or who has 30 years of service at retirement time.

For "early retirement" (the member is under age 65 or has less than 30 years of service) there is a corresponding percentage of decrease in the required benefit amount to allow for an extended period of retirement. Reduction factors are required by Ohio state law and set by the Board as recommended by the actuary.

### Retirement Options

Should the retiring member wish to provide a benefit amount for a beneficiary, this may be done by the selection of one of the optional retirement plans provided for this purpose. Optional plans may be altered by the retired member should the beneficiary die before the retirant or in the event of a divorce.

#### Disability Retirement

A member prevented from performing regular duties on the job after incurring an injury or illness and before reaching age 60 may apply for monthly disability benefits. To qualify, the member must have at least 5 years service credit. In

# **PLAN SUMMARY**

### Disability Retirement (Continued)

addition to the age and service requirements, the member must:

- Have developed the disabling illness or injury after last becoming a member of SERS;
- Have been recommended for approval by a SERS-sponsored medical review board;
- Have applied for benefits within 2 years of the last day of service with the school district.

The benefit is calculated in the same way as a regular service retirement benefit, except that no reduction is made for being under 65 years of age. SERS grants free credit for each year between the member's date of disability retirement and age 60. Benefits range from a minimum of 30% of final average salary to a maximum of 75% and are granted as long as the member remains disabled (subject to re-examination) or until death.

#### Death Benefits

The designated beneficiary of any SERS retirant will receive a \$500 lump sum payment upon the retirant's death. If there is no beneficiary, payment is made to the person responsible for the burial expenses or to the retirant's estate.

#### Survivor Benefits

Qualified dependents of a deceased member may apply for monthly survivor benefits. Such benefits are payable if the member had at least 18 months of Ohio service credit, three of which were served in the 2.5 years prior to the member's death, or if the member was receiving a disability benefit.

If the member was eligible for service retirement but had not yet applied for benefits, the surviving spouse or other single dependent beneficiary of any age can draw a monthly lifetime benefit known as the joint survivor option. Duration of survivor benefits depends primarily on the age and marital status of the dependent(s).

#### Health Care and Other Benefits

Any person receiving a benefit from SERS is entitled to receive medical insurance. Coverage for a spouse and/or dependent children can be provided by means of a monthly deduction from the benefit. Coverage is offered by the selection of either the Aetna insurance company, or for those persons in the Cleveland area, the Kaiser health plan.

If the benefit recipient participates in Medicare B, the premium is paid by SERS and is added to the monthly benefit.

An optional prescription drug program is available to all benefit recipients of SERS and their dependents who are covered under the Aetna health care plan. Participants may either choose to obtain prescription drugs from their local pharmacy and receive reimbursement from the Aetna health care plan or they may elect to receive the drugs by mail from a licensed mail order pharmacy for a minimal fee per medication.

Members who retire on or after June 1, 1986 must have at least 10 or more years of service credit to qualify for the health care benefits.

### Cost Of Living Increases

After 12 months on the benefit rolls, SERS retirants are entitled to an automatic cost of living of 3%. This automatic increase will be paid each year by the Retirement System until the accumulated excess cost of living points fall below 3%. In addition, the legislature has granted several permanent ad hoc increases to SERS retirees, the last such increase being in 1984.
