Certificate of Achievement for Excellence in Financial Reporting

Presented to

School Employees Retirement System of Ohio

For its Comprehensive Annual Financial Report for the Fiscal Year Ended June 30, 1996

A Certificate of Achievement for Excellence in Financial Reporting is presented by the Government Finance Officers Association of the United States and Canada to government units and public employee retirement systems whose comprehensive annual financial reports (CAFRs) achieve the highest standards in government accounting and financial reporting.

December 15, 1997

Dear President and Members of the Retirement Board:

We are pleased to submit to you the Comprehensive Annual Financial Report of the School Employees Retirement System of Ohio (SERS) for the fiscal year ended June 30, 1997. The report provides information about the financial operations of the System, including management's stewardship of the funds entrusted to the System and compliance with all legal requirements placed on the System. The management of SERS has responsibility for the accuracy of the contents and the completeness and fairness of the presentation. Our internal accounting controls are designed to ensure the security of member and employer contributions, to assure responsible safeguarding of our assets and to provide a degree of reliability to all our financial records.

The report is divided into six sections:

- the Introductory Section which contains a Letter of Transmittal, along with the identification of the administrative organization, Certificate of Achievement for Excellence in Financial Reporting and a summary of federal and state legislation affecting the System over the past year;
- the Financial Section which contains an independent accountants' report from our certified public accountants, Coopers & Lybrand L.L.P., and the financial statements of the System;
- the Investment Section which includes the investment report and schedules of portfolio activity for the past year; and
- the Actuarial Section which contains a letter expressing the opinion of our consulting actuaries, Gabriel, Roeder, Smith & Company and results of their annual actuarial valuation;
- the Statistical Section which includes significant data pertaining to the System;
- the Plan Summary Section which provides a concise explanation of the various benefit plans which we provide to our members.

SERS is a cost-sharing multiple-employer public employee retirement system established by the Ohio General Assembly in 1937 to provide retirement benefits to employees of the Ohio public schools who are not required to possess a certificate in order to perform their duties. Benefits provided to participants in SERS include age and service retirement, disability benefits, survivor benefits, death benefits and post-retirement health care benefits. For a more complete description of employees eligible for membership in SERS, as well as benefits provided upon retirement, disability or death, please see the Plan Summary section on page 73.

Major Initiatives

SERS adopted Governmental Accounting Standards Board Statement 25 Financial Reporting for Defined Benefit Pension Plans and Statement 26 Financial Reporting for Postemployment Healthcare Plans Administered by Defined Benefit Pension Plans for fiscal year 1997. Our financial reporting now includes separate statements of plan net assets and changes in plan net assets for pension and health care benefits. Also, investments are reported at fair value in the financial statements instead of cost and investment income includes unrealized gains and losses in the fair value of the portfolio. For more information on the changes brought about by these two statements, please see Note 3 of the Notes to Financial Statements in the Financial Section.

S.B. 82 replaced the "legal list" of investment securities with a "prudent person" standard, giving SERS greater flexibility in choosing investments while emphasizing the joint aims of protecting principal and maximizing income. S.B. 82 also requires Ohio public retirement systems to maintain an amortization period for unfunded pension liabilities of not longer than thirty years and to provide an actuarial report annually to the General Assembly. SERS supported this bill, which became effective March 1997. As a result of this change, the investment staff, the Board and our investment consultant, Frank Russell Co., evaluated our asset allocation. We have modified our asset allocation to increase the amount invested in international equities, including two percent which may be invested in emerging markets. Allocations for venture capital and short-term investments were reduced. These changes became effective on July 1, 1997.

We conducted investment manager searches in an effort to add managers for specific areas of the portfolio. We have added five managers for the real estate portfolio, a REIT manager, an emerging markets manager, and two Ohio-based money managers for the domestic equities and fixed income portfolios.

Months of planning throughout 1997 culminated in SERS' first pre-retirement education program. Its target audience is retirees five to ten years away from retirement. The day long program provides attendees with materials and presentations from an attorney, a financial planner and SERS staff members. Emphasis is placed on SERS benefits and how they may be integrated with or affected by other benefits. The program held in Columbus was very well received and we will be on the road this fall to present it to members in northeast and southwest Ohio.

Sixtieth Anniversary

On each page of this annual report you will find the phrase "60 Years of Service". The origin of SERS has its roots in the Cleveland Custodians' Pension Law. Enacted in 1925, it authorized pension plans for custodians at the option of the school employer. Only the Cleveland School Board adopted such a plan for its custodians, which was later absorbed by SERS. During the 1930's, the Ohio Association of School Business Officials and the Cleveland Welfare Association, a group of school attendance officers, lobbied for a state pension plan to include all non-teaching school employees. Legislation signed by the governor on April 13, 1937 created the School Employees Retirement System. The first board of the

The purpose of the School Employees Retirement System is to improve the personnel, increase the efficiency and morale of public school service, provide a measure of economic security for employees retiring because of advanced age or disability, and to aid in attracting and retaining well qualified persons in public school service.

-From the 1939 Member Handbook

retirement system was composed of the head of the State Teachers Retirement System, representatives of the Attorney General and State Auditor offices and two elected members. The Board appoint-

ed Thomas O'Keefe as the executive director, who along with two employees comprised the first staff of SERS.

At its inception SERS was authorized to pay service and disability benefits. In fact, the System paid disability benefits that first year, a total of \$827.88 to sixteen disability recipients. In 1951, survivor benefits were added and in 1974 health care benefits were made available to retirees. Over the years, contribution rates and benefit formulas have increased. Members were given the opportunity to purchase service credit, including active military time. Cost of living raises as well several ad hoc increases have been added to retirees' benefits over the years.

<u>1937</u>	<u>1997</u>
3	106
10,000	103,739
16	54,554
\$492,000	\$6.3 billion
n	
4%	9%
s 4%	14%
\$828	\$410 million
	3 10,000 16 \$492,000 n 4% 8 4%

As expected, SERS has changed in every measurable way over the past sixty years. But one thing has remained constant: the dedication of SERS' Board and staff to providing the best possible service and benefits to all SERS' members and retirees.

Awards

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to SERS for its comprehensive annual financial report for the fiscal year ended June 30, 1996. The Certificate of Achievement is a prestigious national award recognizing conformance with the highest standards for preparation of state and local government financial reports.

In order to be awarded a Certificate of Achievement, a government unit must publish an easily readable and efficiently organized comprehensive annual financial report, whose contents conform to program standards. Such reports must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. SERS has received a Certificate of Achievement for the last twelve consecutive years (fiscal years ended 1985-1996). We believe our current report continues to conform to the Certificate of Achievement Program requirements, and we are submitting it to GFOA.

Investments

SERS invests accumulated funds to maximize both current income yield and long-term appreciation. The primary objective of our investment policy is to assure that the System meets its responsibilities for providing retirement and other benefits. The portfolio is diversified to maximize total return on assets while operating within prudent parameters of risk, to protect principal from severe depreciation during adverse market conditions and to achieve investment results competitive with those of

the broad market. Details of portfolio composition, rates of return and information concerning our investment policy and operations are provided on pages 27 through 59 of this report.

The fair value of the investments of the System was \$6,263 million at June 30, 1997, an increase of \$940 million from the previous year. Our portfolio returned 19.0% for the year ended June 30, 1997, slightly underperforming our policy benchmark of 20.1%.

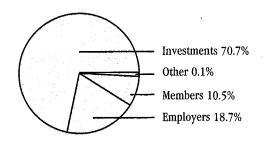

Financial Highlights

The financing of retirement and health care benefits is derived from employee and employer contributions and through investment earnings. Contributions and investment income for fiscal year 1997 totaled \$1,389,357,415. This amount includes realized and unrealized investment gains and losses. The employee and employer contribution rates during fiscal 1997 remained unchanged from the prior year at 9% and 14%, respectively.

Additions to Plan Net Assets

(millions of dollars)

Member Contributions	\$ 146.2
Employer Contributions	259.3
Investment Earnings	981.9
Other	2.0
Total	\$ 1,389.4

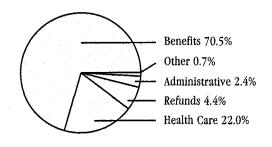

Expenses are incurred primarily for the purpose for which SERS was created, the payment of benefits. Included in the total expenses for 1997 were benefit payments, refunds of contributions due to member terminations or deaths, transfers to other Ohio Systems to provide benefits for those members who had membership in more than one system, and administrative expenses. Expenses for fiscal year 1997 totaled \$443,632,009, an increase of 7.6% over fiscal 1996 expenses. Health care expense increased 8.0% versus last year's increase of 2.1%. The major component of this increase came from higher costs and usage of the mail order prescription drug plan.

Deductions from Plan Net Assets

(millions of dollars)

Retirement Payments	\$312.9
Health Care Payments	97.4
Refunds	19.6
Administrative Expenses	10.8
Other	2.9
Total	\$443.6

Funding and Reserves

Funds are derived from the excess of revenues over expenses, and are accumulated by SERS in order to meet current and future benefit obligations to retirees and beneficiaries. The higher the level of

funding, the larger the accumulation of assets and the greater the investment income potential. Net income for the fiscal year 1997 resulted in an increase in the fund balance of \$946 million.

Fiscal Year	Funding F Period (in years)	Ratio of Assets to AAL
1992	40	71%
1993	40	73%
1994	40	73%
1995	35	74%
1996	34	78%
1997	30	85%

The actuarial valuation for funding purposes, dated June 30, 1997, reflects an unfunded accrued liability for pension benefits of \$983 million. This liability represents the difference between the computed actuarial accrued liability to be paid members and retirees and total valuation assets for basic benefits. As depicted in the accompanying chart, we have reduced our funding period significantly and increased our ratio of assets to actuarial accrued liabilities. This is the result of the Board's focus on

sound financing principles, prudent investments and firm control of costs.

The employer contribution rate of 14% is allocated by Board policy to cover the normal cost and amortization of the unfunded actuarial accrued liabilities for basic pension benefits; the remainder goes toward the funding of post-retirement health care benefits. To provide additional funding for health care benefits, employers pay a surcharge for members whose salary is less than a minimum amount. In 1995, the Board adopted pay-as-you-go funding of health care benefits and designated a minimum reserve for health care expenses to be maintained at 125% of annual health care expenses. At June 30, 1997 the health care reserve stands at 150% of the \$97.4 million recorded in health care expenses for the fiscal year.

Additional information regarding funding is provided within the Actuarial Section (pages 61 to 68) of this report.

Acknowledgements

The preparation of this report is the combined effort of the System's staff under the direction of the Retirement Board. It will be mailed to all employer members of SERS and other interested parties. Summary financial information will be distributed to active and retired SERS membership.

The cooperation of SERS' employers contributes significantly to the success of SERS and is greatly appreciated. We would also like to express our gratitude to the Board, the staff, consultants and others who help ensure the successful operation of the School Employees Retirement System.

Respectfully submitted,

Thomas R. Anderson Executive Director

Joel E. Sofranko, CPA

Director of Finance

State Legislation

During the past year, the Ohio General Assembly has considered various legislation which would impact SERS. The following significant legislation was passed:

H.B. 365 (Effective 9/27/96)

This legislation changes the cost of living adjustment (COLA) calculation. Under prior law, a 3% COLA was granted in those years when the increase in the CPI (plus the retiree's banked points) equalled or exceeded 3%. Under this legislation, a COLA equal to any increase in the CPI for the year (plus the retiree's banked points) not to exceed 3% will be granted each year.

H.B. 450 (Effective 10/29/96)

This legislation conformed SERS' military service credit statutes to the requirements of the Uniformed Services Employment and Reemployment Rights Act of 1994 (USERRA). The legislation also changed the calculation of interest charged on the purchase of military service credit for non-interrupted public service.

H.B. 586 (Effective 3/31/97)

This legislation establishes an alternative retirement program for the purpose of providing academic/administrative employees of public institutions of higher education three or more retirement plans as alternatives to participating in a state retirement system. Under the legislation, an employee of a public institution of higher education may, not later than 90 days after the date of employment or 120 days after commencement of the alternative retirement program, make an irrevocable election to participate in an alternative retirement plan offered by the public institution of higher education. Each public institution of higher education which employs an electing employee shall contribute to the applicable state retirement system, on behalf of the employee, an amount equal to 6% of the employee's compensation to lessen any negative financial impact caused by the alternative retirement plan upon the state retirement system. As of November 30, 1997, no

institution of higher education had established an alternative retirement program.

H.B. 668 (Effective 12/6/96)

This legislation provides that where a member of SERS is convicted of a sexual offense committed in the context of employment, the court may order restitution and the restitution may be paid from the individual's retirement system benefits upon the court issuing a withholding order.

S. B. 82 (Effective 3/6/97)

This legislation replaces SERS' "legal list" investment authority with a "prudent person" standard of authority. The legislation also requires SERS to attain and maintain a 30-year amortization period for unfunded accrued pension liabilities and to provide an annual actuarial report to the General Assembly.

In addition to these enacted bills, SERS has been monitoring the following pending bills:

H.B. 239

This legislation provides for payment, under certain circumstances, of survivor benefits to children of a deceased member of the PERS, SERS, or STRS who was the obligor under a support order. This bill prohibits the spouse from electing a refund of contributions where the obligor was under a support order. The bill also contains a provision that would require spousal consent for a member to chose a retirement plan of payment that would provide less than a 50% benefit to a surviving spouse. As of November 30, 1997, the bill was pending in the House Health and Retirement Subcommittee.

Proposed Disability Reform

Although no bill has been introduced, the Joint Legislative Committee to Study Ohio's Public Retirement Plans has been holding hearings on a draft bill to reform the disability programs of the five state retirement systems. As of November 30, 1997 the draft bill includes the following provisions: that a disability benefit appli-

cant agree to medical treatment, as found necessary, as a condition of receiving disability retirement; that SERS provide an annual report of its disability experience by employer; that a disability benefit be offset by a Workers' Compensation award for the same injury; and that the spousal remarriage penalty be repealed.

Federal Legislation

The impact of Congressional and federal regulatory activities upon SERS has increased during recent years. SERS monitors activities on the federal level and, when necessary, contacts appropriate Congressional representatives and regulatory agencies in a effort to educate them as to the impact of their activities on SERS and its members and beneficiaries. Significant activities on the federal level over the past year include the following:

Taxation: Section 415

H.R. 3448 (Effective 8/20/96). This legislation amends Section 415 of the Internal Revenue Code to lessen its impact on public retirement systems. The legislation enacts a uniform definition of "compensation", exempts governmental plan benefits from the 100% of compensation limitation, authorizes governmental plans to establish excess plans and provides that governmental plan disability retirement and survivor benefits are not subject to Section 415.

Non-Discrimination

H.R. 2014 (Effective 8/8/97). This legislation exempts governmental plans from the non-discrimination requirements of the Internal Revenue Code (IRC). It also amends

IRC section 415(c) to afford members of governmental plans relief from provisions limiting purchases of service credit.

Social Security Offset and Windfall

H.R. 2273. This legislation, introduced on July 25, 1997 by Congressman Jefferson, would change the formula for calculation of the Social Security Offset. The legislation provides that the reduction in Social Security benefits that is required in the case of spouses who are also receiving certain government pensions shall be equal to the amount by which the combined monthly benefit before reduction exceeds \$1,200. Where combined SERS and spousal Social Security benefits are \$1,200 or less, there would be no reduction in the retirant's Social Security benefit. As of November 30, 1997 the bill was pending in the Ways and Means Committee.

H.R. 2549. This legislation, introduced on September 25, 1997 by Congressman Frank, would restrict the application of the Social Security Windfall Benefit Elimination provision. Where an individual's combined monthly benefit from Social Security and a governmental pension plan is \$2000 or less, there would be no reduction.

Public Employee Pension Liability Act of 1995

H.R 510. This legislation, introduced on February 4, 1997 by Congressman Andrews, which is a new version of PEPPRA or PERISA, would establish a federal cause of action for failure of state/local employee pension plans to meet the terms of their plans. The bill would also create a Qualified Review Board to evaluate changes in employer contributions and other changes which affect pension plans.

Report of Independent Accountants

Members of the Retirement Board School Employees Retirement System of Ohio Columbus, Ohio

We have audited the accompanying combining statement of plan net assets of School Employees Retirement System of Ohio as of June 30, 1997, and the related combining statement of changes in plan net assets for the year then ended. These financial statements and schedules are the responsibility of the System's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards and *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, such financial statements present fairly, in all material respects, the financial position of School Employees Retirement System of Ohio as of June 30, 1997 and the results of its operations for the year then ended in conformity with generally accepted accounting principles.

As discussed in Note 3, School Employees Retirement System of Ohio has implemented the provisions of Governmental Accounting Standards Board Statements (GASB) No. 25, Financial Reporting for Defined Benefit Pension Plans and Note Disclosures for Defined Contribution Plans and GASB No. 26, Financial Reporting for Postemployment Healthcare Plans Administered by Defined Benefit Pension Plans.

In accordance with Government Auditing Standards, we have also issued a report dated December 12, 1997 on our consideration of the System's internal control structure and a report dated December 12, 1997 on its compliance with laws and regulations.

Our audit was conducted for the purpose of forming an opinion on the basic financial statements taken as a whole. The schedules of administrative expenses and summary of investment expenses are presented for the purpose of additional analysis and are not a required part of the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, are fairly stated in all material respects in relation to the basic financial statements taken as a whole. The schedule of funding progress for the year ended June 30, 1992 was reported upon by other auditors, whose report stated that the schedule was fairly stated in all material respects in relation to the basic financial statements taken as a whole.

Cooper klybra D. I.P.

School Employees Retirement System Notes To Financial Statements June 30, 1997

1. Description of the System

Organization - The School Employees Retirement System of Ohio (SERS) is a cost-sharing multiple-employer public employee retirement system established by the Ohio General Assembly in 1937 to provide retirement benefits to employees of Ohio public schools who are not required to possess a certificate in order to perform their duties.

The accompanying financial statements comply with the provisions of the Governmental Accounting Standards Board (GASB) Statement No. 14, The Financial Reporting Entity. This statement requires that financial statements of the reporting entity include all of the organizations, activities, functions and component units for which the reporting entity is financially accountable. Financial accountability is defined as the appointment of a voting majority of the component unit's board and either (1) the reporting entity's ability to impose its will over the component unit, or (2) the possibility that the component unit will provide a financial benefit to or impose a financial burden on the reporting entity. SERS does not have financial accountability over any entities. SERS is not considered part of the State of Ohio financial reporting entity. Responsibility for the organization and administration of SERS is vested in the Retirement Board. The Retirement Board is the governing body of SERS. It is comprised of four elected employee-members, one elected retiree-member and two statutory members.

Employer and employee membership data as of June 30, 1997 follows:

Employer Members

<u> </u>	
Local	371
City	193
County	67
Village	49
Vocational	52
Technical	10
College	2
Other	5
Total	-749

Employee Members

Retirees and beneficiaries currently receiving benefits and terminated employees entitled to benefits but not yet receiving them

61,447

Current Employees

Vested	62,871
Non-vested	40,868
Total	103,739

Benefits - Members are eligible for retirement benefits based upon age and service credit as follows: age 60 and earning 5 years of service credit; between ages 55 and 60 and earning 25 years of service credit; or earning 30 years of service credit at any age. The benefit is equal to 2.1% of the member's final average salary, or a minimum of \$86, multiplied by the number of years of credited service. Members are eligible for disability benefits after completion of 5 years of service. Qualified dependents of a deceased member are eligible for monthly survivor benefits. Death benefits of \$500 are payable upon the death of a retiree to a designated beneficiary.

Members with credited service in the State Teachers Retirement System (STRS) or Public Employees Retirement System (PERS) are eligible to receive transferred credited service and funds from either or both of those systems. Any service which is not concurrent with service within SERS will be included in the determination of retirement benefits. Similarly, a member with credited service and funds in SERS may transfer such service to STRS or PERS upon retirement.

Retirees of any of the five state retirement systems must contribute to SERS if they are employed in a non-certificated position in the public schools. These contributions are credited to a separate money purchase annuity payable after age 65 in either monthly payments, if the monthly amount is \$25 or more, or in a lump sum.

Prior to July 1, 1986, all members receiving a benefit from SERS were eligible to receive health care benefits.

Members who retire effective July 1, 1986 or later must have at least ten or more years of service credit to qualify for the health care benefits. Effective August 1, 1989, 1) members retiring with more than 10 but less than 25 years of service credit were required to pay from 25% to 75% of the health insurance premium and 2) the SERS portion of spouse and dependent health insurance premiums was reduced from 50% to 30%.

2. Summary of Significant Accounting Policies

Basis of Accounting - SERS' financial statements are prepared using the accrual basis of accounting. Member contributions are recognized in the period in which the contributions are due. Employer contributions are recognized when due and the employer has made a formal commitment to provide the contributions. Benefits and refunds are recognized when due and payable in accordance with the terms of the Plan.

Investments - Plan investments are reported at fair value. Fair value is "the amount that a plan can reasonably expect to receive for an investment in a current sale between a willing buyer and a willing seller." Fixed income securities and common and preferred stocks are valued based on published market prices and quotations from national security exchanges and securities pricing services. International stocks are then adjusted to reflect the current exchange rate of the underlying country. Securities which are not traded on a national security exchange including real estate, venture capital and foreign exchange contracts, are valued by the respective fund manager or independent appraisers. Short term securities are valued at amortized cost, which approximates fair value.

Net appreciation (depreciation) is determined by calculating the change in the fair value of investments between the end of the year and the beginning of the year, less purchases of investments at cost, plus sales of investments at fair value. Investment expense consists of those expenses directly related to SERS' investment operations, as well as the administrative expenses of SERS' investment department.

Office Building, Equipment and Fixtures

(Non-Investment Assets) - Office building, equipment and fixtures are capitalized at cost when acquired. Improvements which increase the useful life of the property are capitalized. Maintenance and repairs are charged to expense as incurred. Depreciation has been provided using the straight-line method over the following useful lives:

	Estimated
Description	Lives (years)
Furniture and equipment	3-10
Building and improvements	40

Federal Income Tax Status - SERS is a qualified entity under Section 501(a) of the Internal Revenue Code and is therefore exempt from federal income taxes.

Health Care Benefits Incurred and Unpaid - Amounts accrued for health care benefits payable are based upon estimates furnished by the claims administrator. Such estimates have been developed from prior claims experience.

3. Changes in Accounting Policies

In fiscal 1997, SERS adopted Governmental Accounting Standards Board Statement No. 25, Financial Reporting for Defined Benefit Pension Plans and Note Disclosures for Defined Contribution Plans, and Statement No. 26, Financial Reporting for Postemployment Healthcare Plans Administered by Defined Benefit Pension Plans.

Under GASB Statement No. 25, the two required financial statements are the statement of plan net assets and the statement of changes in plan net assets. Statement No. 25 also requires that investments be carried at their fair value. As a result of implementation, there was an increase in net assets of \$539,503,680 at July 1, 1996 over the amount previously reported.

GASB Statements 25 and 26 require that financial statement information for pension and postemployment

healthcare benefits be presented in separate columns of combining financial statements. To meet this requirement, plan assets and liabilities not specifically identifiable to a plan were proportionately split between the pension and postemployment healthcare plans.

4. Contributions

The Ohio Revised Code requires contributions by active members and their employers. Contribution rates are established by the Retirement Board within the allowable rates established by the Ohio Revised Code. The adequacy of employer contribution rates is determined annually by actuarial valuation using the entry age normal cost method. Active members and their employers are required to contribute 9% and 14%, respectively, of active member payroll.

The current employer contribution rate is allocated to basic retirement benefits and health care by the Retirement Board. For fiscal year 1997, the allocation of the employer contribution rate to basic retirement benefits has been established as the rate necessary to cover normal cost, plus an amortization of the unfunded actuarial accrued liabilities over a 30-year period. The employer contribution rate (14%) is allocated 9.79% to basic benefits and the remaining 4.21% is allocated to health care benefits.

During fiscal year 1995, the Retirement Board discontinued the advance-funding of health care benefits on an actuarially-determined basis, and adopted pay-as-you-go funding of health care. The minimum reserve for health care benefits equals 125 percent of annual health care expenses. Thus the target level for 1997 is \$121.8 million, but the actual balance is \$146.4 million.

Employer and employee contributions required and made represented 14% and 9%, respectively, of active member payroll and amounted to \$222.1 million and \$142.8 million, respectively, in 1997. For basic benefits, the employer contributions consisted of \$69.4 million for normal cost and \$94.2 million for amortization of the

unfunded actuarial accrued liability. Employee contributions are applied to normal cost.

The health care surcharge on employers is collected for employees earning less than an actuarially-determined minimum pay, pro-rated according to service credit earned. For fiscal year 1997, the minimum has been established as \$12,400. The surcharge accrued for fiscal year 1997 included in contribution revenue from employers in the Combining Statement of Changes in Plan Net Assets is \$28.0 million.

5. Cash Deposits and Investments

Cash Deposits - By statute, the Treasurer of the State of Ohio (Treasurer) serves as custodian for all SERS deposits. Deposits are classified into three categories of credit risk to give an indication of the level of risk assumed by SERS. Category 1 includes deposits insured or collateralized with securities held by SERS or its agent in the name of SERS. Category 2 includes deposits collateralized with securities held by the pledging financial institution's trust department or agent in the name of the Treasurer. Category 3 includes deposits which are uncollateralized.

As of June 30, 1997, the carrying amount of SERS' deposits was \$9,000,897 and the bank balance was \$11,010,147. Of the bank balance, \$100,000 was insured by the Federal Deposit Insurance Corporation. The remaining bank balance was uncollateralized. The carrying amount of deposits is separately displayed on the balance sheet as "Cash".

Investments - The Retirement Board (the Board) has the responsibility to invest available funds of the System, in accordance with applicable state law and the guidelines set forth by the Board. SERS does not hold investments in any one organization representing five percent or more of plan net assets.

Effective March 6, 1997, S.B. 82 amended O.R.C 3309.15 and directs the Board to invest funds of the System fol-

lowing the "prudent person standard." This fiduciary standard dictates that the Board consider the probable safety of investments, avoid speculative investments, and invest as persons of prudence, discretion, and intelligence would manage their own affairs. The Board accomplishes this through a combination of internal and external investment professionals. Prior to S.B. 82, the Board was limited to a "legal list" of specific types of assets with minimal flexibility.

In accordance with Statement No. 3 of the Governmental Accounting Standards Board, SERS' investments are categorized to give an indication of the level of risk assumed by SERS at year-end. Category 1 includes investments that are insured or registered, with securities held by the Treasurer or custodial agent bank in SERS' name.

Category 2 includes uninsured and unregistered investments, with securities held by the counterparty's trust department or agent in SERS' name. Category 3 includes uninsured and unregistered investments, with securities held by the counterparty, or by its trust department or agent, but not in SERS' name.

In accordance with a contractual relationship between the Treasurer and a custodial agent bank, all securities subject to categorization are Category 1 investments held in book entry form in a unique account so as to be identified at all times as the possession of SERS. Direct mortgage loans, commingled stock funds, real estate funds, and venture capital funds are investments which by their nature are not categorized for level of risk purposes.

Category 1	Ca	rrying Value	Fair Value
U.S. government obligations	•

Foreign Currency Contracts - Forward currency contracts are legal agreements between two parties to purchase and sell a foreign currency, for a price specified at the contract date, with delivery and settlement in the future. SERS enters into foreign currency contracts to hedge the foreign currency movements of assets held in the underlying funds. The System hedges 50% of the value of its assets in these funds to minimize the volatility of the underlying currency movements. As of June 30, 1997, SERS had outstanding contracts in the amount of \$427,851,948 which had a maturity date of July 28, 1997 and net gains on rejoined contracts of \$16,881,169 for the year. The System is exposed to credit loss in the event of non-performance by the other party to the contracts, however, the System does not anticipate non-performance by the counterparty.

Derivatives - The Ohio Revised Code authorizes SERS to invest in various types of instruments. The System has investments in mortgage-backed, asset-backed, interest-only strips, principal-only strips and adjustable-rate securities. These securities serve to maximize yields and to offset volatility in the Fund due to interest rate fluctuations. The System is exposed to market risk in the event of changing interest rates, security prices, and principal values of these individual securities. The System is also exposed to credit risk in the event that sufficient collateral is not maintained by the issuers of the asset-backed securities in case of default, however, SERS is not aware of any such instance. The fair value of these securities totaled \$841.2 million at June 30, 1997, representing 13.4% of the fair value of all investments.

6. Property and Equipment (Non-Investment Assets)

A summary of property and equipment at June 30, 1997 follows:

Land	\$ 1,178,055
Building and	
improvements	4,268,349
Furniture and	
equipment	5,944,984
	11,391,388
Less accumulated	
depreciation	5,412,889
	\$ 5,978,499
	THE TAXABLE PARTY OF THE PARTY

7. Deferred Compensation

Employees of SERS may elect to participate in the Ohio Public Employees Deferred Compensation Program (Program), created in accordance with Internal Revenue Code Section 457. Under the Program, employees may elect to defer a portion of their pay until a later date, usually after retirement. The deferred pay and any income earned thereon is not subject to income taxes until actually received by the employee.

As of June 30, 1997, the market value of investments in the Program totaled \$2,415,645 and has been included in other assets. Under the terms of the Program agreement, these monies are subject to the claims of SERS' general creditors. Accordingly, this amount is reflected as an asset along with a corresponding liability to the employees

participating in the Program. Participating employees are general creditors of SERS with no preferential claim to the deferred funds. Investments in the Program are held by the Program's agent in SERS' name.

8. Defined Benefit Pension Plan

SERS contributes to the Public Employees Retirement System of Ohio (PERS), a cost-sharing multiple-employer defined benefit plan. Under the authority granted by Section 145 of the Ohio Revised Code, PERS provides retirement, disability and survivor benefits for the public employees of Ohio. PERS issues a publicly available financial report that includes financial statements and required supplementary information. That report may be obtained by writing PERS, 277 East Town Street, Columbus, Ohio 43215.

Plan members are required to contribute 8.5% of earnable salary and employers are required to contribute at an actuarially determined rate. The current rate for miscellaneous employers is 13.55% of annual covered payroll. The contribution requirements for employees and employers are established and may be amended within statutory limits by the PERS Board. The payroll for employees covered by PERS for the year ended June 30, 1997 was \$4,149,295; SERS' total payroll was \$4,523,970. SERS' contributions to PERS for the years ending June 30, 1997, 1996 and 1995 were \$562,230, \$556,142 and \$564,658, respectively, equal to the required contributions for each year.

In addition to pension benefits, PERS provides postemployment health care benefits, in accordance with state statutes, to all employees who retire with 10 or more years of qualifying Ohio service credit and to disability recipients. At December 31, 1996, the plan had approximately 369,000 active participants.

A portion of each employer's contribution to PERS is set aside for the advanced funding of postemployment health care. Of the 13.55% of employee payroll contributed by

SERS to PERS, 5.11%, or approximately \$212,000, was the portion used to fund health care. Statutory rates equal the actuarially determined contribution requirements.

The actuarial present value of accrued postemployment benefits was determined based on the entry age normal method of funding. Significant actuarial assumptions used in the December 31, 1995 valuation (most recent available) were (a) investment rate of return of 7.75%, (b) investments valued at book value plus or minus realized or unrealized investment gains and losses amortized at 25% per annum over a four-year period. (c) no change in the number of active employees, (d) base pay rate increases of 5.25% and annual pay increases over and above the 5.25% base increase ranging from 0% to 5.1%, and (e) health care increases of 5.25% annually.

Net assets held in trust at December 31, 1996 for postemployment health care benefits were \$7.3 billion. Unfunded actuarial accrual liabilities for local and miscellaneous employers are amortized over a period of 34 years for 1995 (the most recent valuation).

9. Compensated Absences

As of June 30, 1997, \$353,375 was accrued for unused vacation and sick leave for SERS' employees. Employees who retire or resign are entitled to full compensation for all earned unused vacation. Unused sick leave pay is forfeited upon termination. However, employees who retire, become disabled or deceased after five years of service are entitled to receive payment for a percentage of unused sick leave.

10. Contingent Liabilities

SERS is a party in various litigation. While the final outcome cannot be determined at this time, management is of the opinion that the liability, if any, for these legal actions will not have a material adverse effect on SERS' financial position.

1996	150,103,657	100	
1997	144,487,949	100	

^{*}The amounts reported in this schedule do not include contributions for postemployment healthcare benefits.

Notes To Required Supplementary Schedules

1. Description of Schedule of Funding Progress

Each time a new benefit is added which applies to service already rendered, an "unfunded accrued liability" is created. Laws governing the System require that these unfunded accrued liabilities be financed systematically over a period of future years. Also, if actual financial experiences are less favorable than assumed financial experiences, the difference is added to unfunded accrued liabilities.

The Schedule of Funding Progress includes two ratios that provide information about whether the financial strength of the System is improving or deteriorating over time. An improvement is indicated when the funded ratio (assets expressed as a percentage of the actuarial accrued liability) is increasing and the ratio of the unfunded actuarial liability to payroll is decreasing.

The information presented in the required supplementary schedules was determined as part of the actuarial valuation at the date indicated. Additional information as of the latest actuarial valuation follows:

Valuation date: June 30, 1997
Actuarial cost method: Entry age normal
Amortization method: Level percent of payroll
contributions

Remaining amortization period: 24 Years
Asset valuation method: 4-Year smoothed market
Actuarial Assumptions:

Investment rate of return* - 8.25%

Projected salary increases* - 5.25% to 9.25%

Cost of living adjustments - 3% simple

Investment Distribution at Fair Value as of June 30, 1997

Ten Year Investment Comparison at Fair Value (in billions)

Investment Report

Introduction

The Ohio Revised Code and Board-adopted policies govern the investment program of SERS. During the year, the governing state statute was modified to adopt a "prudent person" provision for investment activities.

Furthermore, state statutes require that SERS' Board and its fiduciaries discharge their duties solely in the interest of the fund's participants and beneficiaries. Board policy specifically outlines diversification methods, return expectations, and risk levels that SERS fiduciaries should adhere to when managing the System's assets.

Accomplishments

During the past fiscal year, two major goals were set. The first goal was for SERS staff, investment consultant and the Board to review SERS' assets and liabilities for possible revisions to individual asset classes. A review of Ohio-based money managers for possible additions to our portfolio was the second goal.

Both goals were accomplished. In the first instance, our asset allocation was modified to increase the amount invested in non-US equities from ten to fifteen percent of the investment portfolio. Two percent of this exposure may be invested in non-US emerging markets. Venture capital was reduced from two to one percent of the portfolio. Short-term investments were reduced from five to one percent of the portfolio. Additionally, the allowable ranges for investing for equities, fixed income, and venture capital were narrowed. These policy changes became effective on July 1, 1997.

A review of Ohio-based money managers led to the selection of Oak Associates, an Akron-based US Equity manager, and Johnson Investment Counsel, a Cincinnati-based Fixed Income manager. Funding occurred in January 1997.

In addition to these two goals, other major efforts were undertaken during the year:

- Nearly doubling the size of the real estate portfolio to slightly below the Board's long-term target with the selection of five new managers and increased funding for current managers.
- In addition to the Ohio-based manager search, concluded searches for a specified REIT manager (Real Estate) and an emerging markets manager (non-US Equity). These managers were subsequently funded in July 1997.

Asset Allocation

As mentioned earlier, the SERS staff, investment consultant and Board were involved in the selection of five additional advisors for the real estate portfolio and an additional assignment for a non-US international money manager in emerging market investing. Nearly 60% of the US Equity and non-US Equity continues to be passively invested through index funds.

As of June 30, 1997, the portfolio was diversified in the following manner:

- US Equity was 45.6% of the Fund compared to our 45% target
- Non-US Equity was 15.5% of the Fund compared to our 15% target
- US Fixed-Income was 27.3% of the Fund compared to our 28% target
- Real Estate was 9.4% of the Fund compared to our 10% target
- Venture Capital was 0.5% of the Fund compared to our 1% target, and
- Short term assets were 1.7% of the Fund compared to our 1% target.

Based on the current holdings, the fund is at or near the long-term allocations set by the Board for each asset class.

Equities

Our well-diversified investments of the SERS US equity and non-US equity portfolios are designed to limit risk

Investment Report (Continued)

from a specific company or economic region. Different equity managers are hired with mandates for specific style characteristics.

These styles include growth and value stocks as well as large, medium, and small capitalization companies. By having various styles, under-performance in one area may be balanced by better than expected performance elsewhere. For international managers, the approach is augmented by a regional or country expertise.

Both US and non-US equity portfolios earned excellent returns for fiscal year 1997. The US equity portfolio returned 29.6% for the year compared to the benchmark Russell 3000 return of 30.6%. For three years the return equals 26.6%; for five years the return equals 18.3%.

The non-US equity portfolio returned 17.1% for the year compared to the benchmark Morgan Stanley Capital International, Europe, Australia, and Far East (MSCI-EAFE) Index of 17.7% (50% US \$ Hedged). Because this portfolio is newer, no three or five year returns have been established.

Fixed Income

The fixed income investments are managed to provide diversification against equities. While all of our managers have a broad U.S. market mandate, individual management firms have been chosen based on their differing approaches to this mandate. Consequently, within the portfolio there exists some style diversification which would soften the impact of varying market trends.

Performance of the portfolio has been above the benchmark index, the Shearson Lehman Aggregate. For the fiscal year ending June 1997, the portfolio returned 8.5% versus the index return of 8.2%. For three years the return equals 8.3%; for five years the return equals 6.5%. On June 30, 1997, the fixed income portfolio had an average maturity of 11.5 years and an effective duration of 4.8 years. The benchmark had an average maturity of 8.6 years and an effective duration of 4.7 years.

Compared to the index sector composition, the SERS fixed income portfolio was underweight in treasury and

agency securities, and overweight in mortgage-backed, corporate and asset-backed securities. The portfolio had a yield to maturity of 6.49% with an average coupon of 6.96%. The average quality of the portfolio was AAA rated, matching the index rating.

Real Estate

SERS had nearly \$600 million invested in real estate through commingled funds and separate accounts at June 30, 1997. The NCREIF Property Index, a national barometer of real estate performance, mirrored the continued improvement in the real estate market with one-year returns increasing to 10.1% in fiscal year 1997 from 8.2% in fiscal year 1996.

The one-year return from real estate held by SERS was 12.2%, exceeding the benchmark NCREIF Property index by 210 basis points. For three years, the return equals 11.3%; for five years the return equals 7.3%, putting SERS in the top quartile of real estate investment returns for each of these time periods.

Much of the recent improvement has been led by the office sector, particularly suburban markets. The western region, with California leading the way, showed strong increases in returns for most property types.

Improved market fundamentals and heavy capital flows from private, public, and institutional investors have contributed to the continued improvement in real estate. While some markets have begun to show signs of new building, many believe that the current real estate cycle will remain healthy for the next several years.

Venture Capital

With assets at \$28.8 million, venture capital is not a large percentage of the portfolio. Returns for fiscal year ending June 30, 1997 were a negative 24.5%. The makeup of the portfolio contributed to the loss – several investments are near the end of their expected holding period and others are in the early stages of investing. In both cases, positive returns are difficult to generate. Even though the results for the past fiscal year were disap-

Investment Report (Continued)

pointing, our results of 39.0% and 37.2% for the past three and five year periods, respectively, have been outstanding.

During the next year we expect to examine the feasibility of widening the focus of this area to all alternative investments, including other private equity, natural resources, and private debt instruments.

Fund Strategy

The main theme of our strategy for the next fiscal year will be to continue to maximize the return to the Fund with an acceptable level of risk. By diversifying with different asset classes and different approaches within each asset class, we can continue to exceed the actuarial earning rate needed to meet future liabilities over the longterm.

During the next fiscal year, the staff will commence a search in the equity area for active small capitalization managers. In the past we have only invested in this class through passive indexes because of restrictive statutes which were updated in 1996.

Understanding the risks and rewards of investing in alternative asset classes will be the second large focus for the coming year. A recommendation will be presented to the Board prior to the end of the fiscal year. The recommendation will include what percentage, if any, should be allocated to alternative investments and secondly, the structure of how the investing should be done.

Investment Policy

A. Purpose.

The purpose of this Statement of Investment Policy is to define the Retirement Board's investment philosophy and objectives for the School Employees Retirement System of Ohio. This statement sets forth policies and describes the organization and division of responsibilities to prudently implement the Board's philosophy and objectives in accordance with Section 3309.15 of the Ohio Revised Code. It also establishes the framework and specific objectives to monitor investment performance and proxy voting, and to promote effective communication between the Board and the Investment Staff and Investment Managers.

The contents of this Statement of Investment Policy and the associated Guidelines and Objectives are subject to change at any time by the Board. The Statement will be reviewed and revised periodically to assure that it continues to reflect the attitudes, expectations and objectives of the Board.

B. Background.

The School Employees Retirement System of Ohio was established by the state legislature to provide retirement and disability benefits for all non-certificated persons employed by the state's school districts. This purpose is sustained by the member and employer contributions and returns realized from investment of those contributions.

The System is governed by a seven member board, including the Ohio Attorney General and State Auditor, with responsibility for the investment function as set forth in the Ohio Revised Code. In addition to the investment function, the Ohio Revised Code also sets forth the fiduciary responsibility of the Board and of other fiduciaries in discharging their duties with respect to the fund. This Statement of Investment Policy incorporates and is subject to all restrictions, guidelines and obligations set forth by the Ohio Revised Code.

C. Investment Philosophy.

1. Risk Posture.

The Board realizes that its primary objective is to

assure that the Plan meets its responsibilities for providing retirement and other benefits. Therefore, it shall always act to assure that the level of investment risk in the portfolio shall be prudent and shall not jeopardize that primary objective.

2. Return.

The Board believes, however, that over the long-term there exists a relationship between the level of investment risk taken and rate of investment return realized. The Board feels that assumption of a moderate level of risk associated with investments is reasonable and justified in order to enhance potential long-term investment results.

3. Diversification.

The Board seeks diversification by asset class and by investment approach and individual investments within asset classes to reduce overall portfolio risk.

4. Liquidity Requirements.

The System anticipates positive cash flow over the near-term and intermediate-term. Liquidity, for the purpose of immediate and intermediate-term benefit payments, is therefore not a major consideration in the investment of funds for the foreseeable future.

D. Investment Objectives.

In defining investment objectives the Board seeks to enhance the investment returns of the fund in order to permit higher benefits and to achieve lower costs. Therefore, it adopts the following general investment objectives:

1. Performance Objectives.

a. Maximize Total Return on Assets: Recognizing that the System's obligations will increase as a result of inflation, to maximize the total return on assets available for the provision of benefits while operating in accordance with applicable regulatory restrictions and within prudent parameters of risk.

- b. Preservation of Principal: To protect the System from severe depreciation in asset value during adverse market conditions.
 - This objective shall be attained by broad diversification of assets and careful review of risks.
- c. Competitive Results: To achieve investment results competitive with those of the broad market and of similar funds. Long-term results shall be emphasized.

2. Risk.

- a. Stability: While the Board seeks higher long-term investment results, it also seeks to avoid major fluctuations in year-to-year results.
- b. Risk Level: The Board seeks to maintain a reasonable degree of total portfolio risk, defined as that which would be experienced by similar retirement systems.

3. Other Objectives.

a. Ohio Investments: Where investment characteristics, including return, risk and liquidity, are equivalent, the Board will give careful consideration to investments which will have a positive impact on the economy of Ohio.

E. Implementation Approach.

In order to monitor and control the activities within the investment function, the Board has reserved certain responsibilities for itself. It has also delegated certain responsibilities to the Investment Staff, to organizations serving as Investment Managers and, from time to time, to other consultants or advisors. These are enumerated in Section F, Investment Organization and Responsibilities.

In fulfilling its fiduciary duties, the Retirement Board employs a competent and qualified Investment Staff for the management of the major portion of portfolio assets. In those areas where specialized expertise is required, the Retirement Board employs the services of outside Investment Managers. Criteria to be used in the selection of such Investment Managers are also enu-

merated in Section F.

The Board has also established a reporting process for regular and timely review and evaluation of investment results. This is described in Section G, Review and Evaluation. Finally, the Board has adopted Investment Guidelines and Objectives for each asset class and each investment management accountability unit within those asset classes. These guidelines also specify long-term target ratios for asset allocation, as well as permissible ranges related to those target allocations. These guidelines and objectives are regularly evaluated and updated based on market conditions, investment results and the recommendations of the Investment Staff, Investment Managers and other consultants or advisors.

F. Investment Organization and Responsibilities.

1. Responsibilities of the Retirement Board.

The Retirement Board recognizes its responsibility to ensure that the assets of the Plan are managed effectively and prudently, in full compliance with all applicable laws, and for the exclusive benefit of participants and beneficiaries. The Board believes it can best manage those responsibilities by delegating certain specific duties to others, as described below. In addition, the Board may designate certain of its members to act as an Investment Committee or a Subcommittee from time to time, and may delegate certain decision-making or fact-finding responsibilities to that committee or subcommittee.

Specific responsibilities of the Retirement Board or its Investment Committee or Subcommittee are as follows:

- a. Ensure that all fiduciaries comply with the Ohio Revised Code and any other applicable regulations and legislation.
- b. Establish investment policies, guidelines and objectives for the assets of the Plan and communicate them to the Investment Staff and Investment Managers.

- c. Appoint and discharge those with responsibility for managing the Plan's assets, including Investment Managers, consultants and any others involved.
- d. Establish a proxy policy; and review proxy governance issues and reports from the Investment Staff and Investment Managers at least annually.
- e. Request, receive and review reports from the Investment Staff and Investment Managers.
- 2. Responsibilities of the Investment Staff.

The Investment Staff, headed by the Executive Director and the Director of Investments, shall accept the following responsibilities. The Executive Director shall:

- a. Obtain necessary reports on the investment results of the Plan's assets on a timely basis as specified in Section G, Review and Evaluation.
- Retain any consultants or advisors deemed necessary or desirable for assistance in the investment of Plan assets, and for meeting his responsibilities.
- c. Oversee the investment function.

The Director of Investments shall accept the following responsibilities:

- a. Administer the policies, guidelines and objectives adopted by the Retirement Board of the School Employees Retirement System of Ohio in compliance with the relevant sections of the Ohio Revised Code.
- b. Inform and communicate to other Plan fiduciaries, including all Investment Managers, the requirements of the Ohio Revised Code and the policies, guidelines and objectives adopted by the Retirement Board, including the proxy policy, and monitor their compliance.

- c. Prepare annually an Annual Plan for the investment of the Plan's assets with recognition of the target asset mix ratios and the permissible ranges for asset allocation established by the Board.
- d. Implement the Annual Plan, exercising the judgments allowed by the Board as to the asset allocation ranges for that year.
- e. Report to the Board or its Investment Committee any intra-year changes in the Annual Plan, in the asset allocation among managers, or proposed changes in the policy, guidelines or objectives which the Investment Staff deems desirable or which are recommended by an Investment Manager or other consultants or advisors.
- f. Oversee the activities of the Investment Staff.
- 3. Responsibilities of the Investment Managers.

 Each Investment Manager, including Investment
 Staff with respect to internally managed assets,
 shall accept the following responsibilities for the
 specified investment management accountability
 unit which it manages.
 - a. Manage the assets within its control in compliance with the relevant sections of the Ohio Revised Code and with the policies, guidelines and objectives adopted by the Retirement Board. Vote proxies in accordance with the Retirement Board's policy and guidelines; and periodically prepare a report reflecting proxy voting activity.
 - b. Exercise investment discretion within the guidelines and objectives specified, including decisions to buy, hold or sell securities based on the manager's current investment strategy and outlook and compatible with such objectives.
 - c. Inform the Retirement Board or the Investment Committee of any substantial changes in invest-

ment strategy, portfolio structure, value of assets, and of any organizational changes, including that of ownership, affiliation, organizational structure, financial condition, or changes in professional personnel staffing the investment management organization.

- d. Prepare reports for the Board or Investment Committee prior to any scheduled meetings, but at least on a quarterly basis.
- e. Recommend to the Board or Investment Committee any changes in policy, guidelines or objectives which the Investment Manager believes to be desirable.

4. Criteria For Investment Managers.

In instances where the Retirement Board has determined it is desirable to employ the services of an outside Investment Manager, the following criteria shall be used in the selection of such firms:

- a. Organizational Qualifications: To be selected, the organization shall be qualified to serve as a fiduciary to the System, shall comply with all applicable nondiscrimination and affirmative action requirements, shall adequately address potential conflicts of interest and shall have a history of professionalism and ethical performance.
- b. Investment Approach: The approach utilized by the organization shall be compatible with the System's objectives and guidelines. It shall also be complementary to the System's other Investment Managers.
- c. Personnel: The organization shall have an experienced professional staff with adequate research and support personnel and a credible program or history demonstrating the ability to retain key personnel.
- d. Performance: The organization and/or its personnel shall have demonstrated the ability to achieve

above average performance in implementing the investment approach for which it is being considered. Satisfactory client references shall also be available.

G. Review and Evaluation.

The Board shall review and evaluate periodic reports on the investment results of the Plan's assets, as described below, obtained by the Executive Director. In addition, the Board shall review the periodic reports of each Investment Manager. In these reviews, it is intended that greater emphasis shall be given to long-term results than to short-term results. Following is the intended frequency for the review and evaluation, although these may be altered by the Board as deemed necessary:

1. Quarterly.

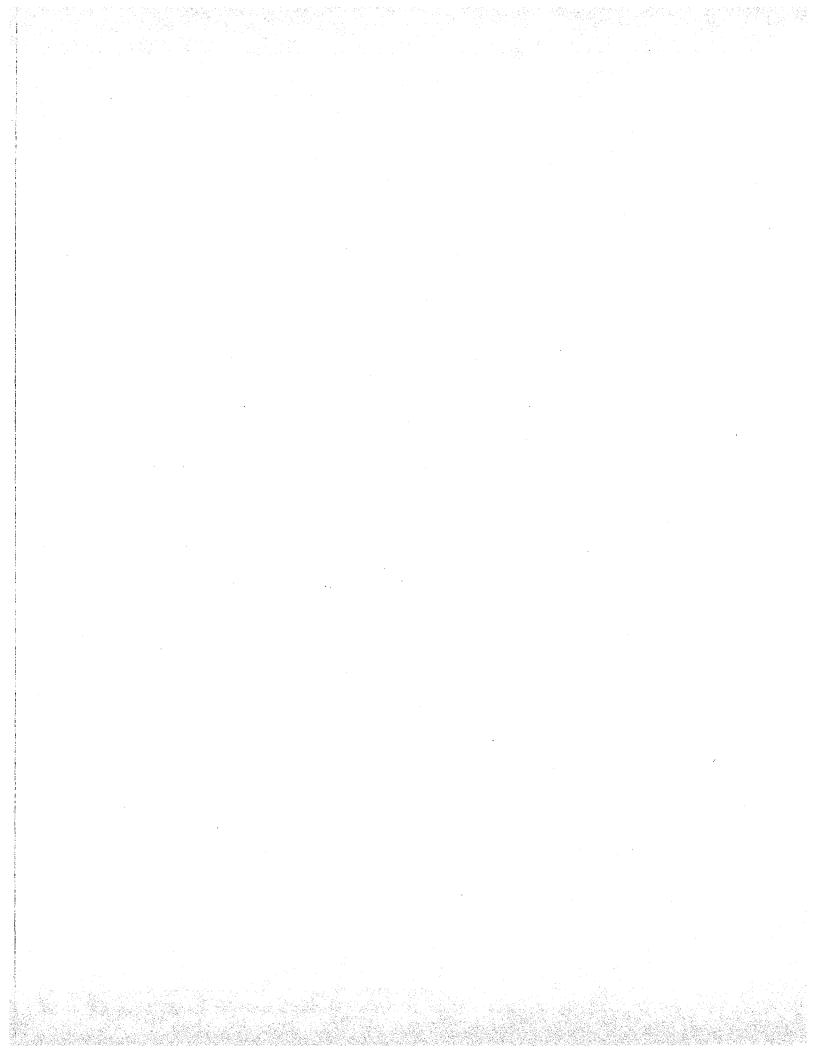

Summary Investment Reports - including highlights and commentary of investment performance, asset composition and holdings for each asset class and each investment management accountability unit. These reports shall identify any results which require the attention of the Board.

Investment Manager Reports - prepared by the manager of each investment management accountability unit, reporting on the results of the most recent period.

2. Annually.

Detailed annual investment reports - these reports will include the contents of the quarterly summary reports, as well as additional detail regarding the investment results for each investment management accountability unit.

Written and/or verbal reports presented by the manager of each investment management accountability unit. These shall be scheduled on a staggered basis throughout the year, as determined appropriate by the Board.

December 2, 1997

The Board of Trustees School Employees Retirement System of Ohio Columbus, Ohio

Dear Board Members:

The basic financial objective of the School Employees Retirement System of Ohio (SERS) is to establish and receive contributions which when expressed in terms of percents of active member payroll will remain approximately level from generation to generation of Ohio citizens, and which when combined with present assets and future investment return will be sufficient to meet the present and future financial obligations of SERS.

In order to measure progress toward this fundamental objective, SERS has annual actuarial valuations performed. The valuations (i) measure present financial position, and (ii) establish contribution rates that provide for the current cost and level percent of payroll amortization of unfunded actuarial accrued liability over a reasonable period. The latest completed actuarial valuation was based upon data and assumptions as of June 30, 1997. This valuation indicates that the contribution rate, established by the Board of Trustees, for benefits then in effect, meets the basic financial objective. This contribution rate is 9.02% of payroll for 103,739 school employees. The statutory employer contribution is 14% of pay. A SERS policy decision now provides the following allocations: to basic benefits and the Medicare Part-B supplement, the portion which will pay normal cost and 24 year amortization of unfunded actuarial accrued liabilities; and to health care benefits, the remainder of employer contributions.

The actuarial valuation of the basic benefits and Medicare Part-B supplement is based upon financial and participant data which is prepared by retirement system staff, assumptions regarding future rates of investment return and inflation, and rates of retirement, turnover, death, and disability among SERS members and their beneficiaries. The data is reviewed by us for internal and year to year consistency as well as general reasonableness prior to its use in the actuarial valuations. It is also summarized and tabulated for the purpose of analyzing trends. The assumptions were adopted by the Board of Trustees and were based upon actual experience of SERS during the years 1990 to 1995. Assets are valued according to a method that fully recognizes expected investment return and averages unanticipated market return over a four-year period. The assumptions and methods utilized in this valuation, in our opinion, meet the parameters established by Governmental Accounting Standards Board Statement No. 25.

Page 2 December 2, 1997 The Board of Trustees

TJC/ks

The financial condition of health care benefits is different and is being significantly affected by the provisions of Act 290 of 1988. Act 290 established a health care surcharge, a program to determine a minimum annual pay for use in calculating employer contribution dollars.

On the basis of the 1997 valuation of the health care benefits, excluding the Medicare Part-B supplement, the allocated contributions are sufficient to provide for a health care reserve equal to 125% of estimated annual claim costs, the funding target established by the Board in 1995.

The current benefit structure is outlined in the Plan Summary. We provided the information used in the supporting schedules in the Actuarial Section and the Analysis of Funding Progress in the Financial Section.

Based upon the results of the valuation of the basic benefits and Medicare Part-B supplement, it is our opinion that the School Employees Retirement System of Ohio continues in sound condition in accordance with actuarial principles of level percent of payroll financing.

Respectfully submitted,

Thomas J. Cavanaugh, F.S.A.

Senior Consultant & Actuary

Actuary

GABRIEL, ROEDER, SMITH & COMPANY

Statement of Actuary Valuation as of June 30, 1997

Actuarial Cost Method and Assumptions

Basic Retirement Benefits

Employer contribution rates for basic benefits are determined using the entry age normal actuarial cost method. This method produces an employer contribution rate consisting of (1) an amount for normal cost (the estimated amount necessary to finance benefits earned by employees during the current service year), and (2) the amount for amortization of the unfunded actuarial accrued liability. The maximum statutory rate is 14%.

The present employer contribution rate of 14% is allocated between basic benefits and health care on the basis of SERS' policy decision. For the year ended June 30, 1997, the policy required the determination of a rate for basic benefits which will amortize the unfunded actuarial accrued liabilities over a 30-year period, with the remainder of the employer contribution rate allocated to providing health care benefits. The rate determined for the funding of basic retirement benefits for the year ended June 30, 1997 is 9.79%.

Health Care Benefits

Initially, beginning in 1974, the contribution rate for health care benefits was established at 0.75%, included in a total employer contribution rate of 12.5%. Health care contribution rates have been increased at various times since 1974, and the total employer contribution rate has been increased to the statutory 14% maximum. The portion of the employer contribution rate allocated to health care for the year ended June 30, 1997 is 4.21%. Effective with the 1995 fiscal year the Retirement Board replaced the level cost financing of health care with pay-as-you-go financing. To provide program security and stability, the asset target level for the health care fund is 125 per cent of annual health care. For 1997, this resulted in a health care reserve of \$146.4 million versus a targeted level of \$121.8 million.

In 1988, House Bill 290 provided for an employer contribution surcharge as an additional source of funding for health care. The surcharge is equal to 14% of the differ-

ence between the minimum pay and the member's pay, pro-rated for partial service credit. For the fiscal year 1997, the minimum pay has been established as \$12,400. The surcharge, added to the unallocated portion of the 14% employer contribution rate, provides for maintenance of the asset target level for the health care fund.

Actuarial Assumptions

The assumptions used for the actuarial valuation were adopted by the Retirement Board after consulting with the actuary. The actuarial assumptions used in making the valuation were revised as set forth in the Gabriel, Roeder, Smith & Company Investigation Report dated April 11, 1996 for the period from July 1, 1990 through June 30, 1995, and were adopted as of the June 30, 1996 valuation. Differences between assumed and actual experience (actuarial gains and losses) become part of unfunded actuarial accrued liabilities. When these differences between assumed and actual experience have been observed to be sizable and persistent, a change is made to the actuarial assumptions.

The valuation assets as of June 30, 1997 were determined on a market-related basis. The asset valuation method recognizes assumed investment income fully each year. Differences between actual and assumed investment income are phased in over a closed four-year period. To this was added the present value of expected future payments for House Bills 284 and 204, or \$1,546,651.

The following significant assumptions were used in the actuarial valuation as of June 30,1997:

(1) a rate of return on the investments of 8.25% compounded annually (net after expenses). The real rate of return is the portion of total investment return which is more than the inflation rate. Considering inflation recognition of 4.25 percent, the 8.25 percent investment return rate translates to an assumed real rate of return of 4 percent;

Statement Of Actuary (Continued)

- (2) projected salary increases of 4.25%, compounded annually, attributable to inflation;
- (3) additional projected salary increases ranging from 1% to 5% per year, attributable to seniority and merit. Pay increase assumptions for individual active members are shown for sample ages in the following table.

Increase Next Year

Sample Ages	Merit & Seniority	Base (Economy)	<u>Total</u>
20	5.0%	4.25%	9.25%
30	4.3	4.25	8.55
40	3.8	4.25	8.05
50	2.4	4.25	6.65
60	1.0	4.25	5.25

(4) eligibility for age and service retirement was assumed to be: age 50 with 30 or more years of service; age 55 with 25 or more years of service, or age 60 with 5 or more years of service.

Probabilities of retirement with age and service allowance are shown in the following table for sample ages.

Probabilities of Age & Service Retirement
Percent of Eligible Active Members
Retiring within Next Year

Sample Ages	Men	Women
50	30%	24%
55	20	18
60	15	30
65	35	30
70	25	38
75	100	100

- (5) mortality of participants based on the 1971 Group Annuity Mortality Table projected to 1984 set back one year for women and men;
- (6) rates of separation from active service before retirement are developed on the basis of actual plan experience. Probabilities of separation for sample ages are shown in the following table.

Probabilities of Separation from Active Employment before Age & Service Retirement

Percent of Active Members Separating within Next Year

Men

Sample Ages	Death	Disability	Other
20	0.02%	0.00%	6.09%
30	0.04	0.10	4.60
40	0.08	0.36	3.42
50	0.24	0.80	3.06
60	0.60	2.75	2.20

Women

Sample Ages	Death	Disability	Other	
20	0.01%	0.00%	8.04%	
30	0.02	0.03	6.31

50	0.08	0.48	2.67	
60	0.21	3.25	2.66	

(7) benefits will increase 3% per year after retirement.

Statement of Actuary (Continued)

Actuarial Accrued Liabilities

Accrued liabilities are the present value of plan promises to pay benefits in the future, based upon service already rendered. A liability has been established (accrued) because the service has been performed, but the resulting monthly cash benefit may not be payable until years in

the future. Accrued liabilities are the result of complex mathematical calculations performed by a group of specialists, the plan's actuaries. The results of the computed actuarial accrued liabilities, using the entry age normal actuarial cost method, are disclosed in the following schedule.

Actuarial Accrued Liabilities June 30, 1997	
Present Value of	Basic Benefits
Future monthly benefits and death benefits to present retirees and survivors	\$ 2,996,028,254
Monthly benefits and refunds to present inactive members	
Service allowances to present active members	2,911,956,402
Disability allowances to present active members	338,869,794
Death-after-retirement benefit (\$500) on behalf of present active members	1,159,629
Survivor benefits on behalf of present active members who die before retiring	44,253,400
Medicare Part B supplement	35,728,832
Refunds of member contributions of present active members	. 27,418,832
Benefits for present active members	

Membership Data

Information regarding active, inactive, and retired members is obtained from computer tapes provided by the

Benefits for present covered persons ...

retirement system. Membership data contained on the computer tapes is examined and tested for reasonableness.

^{**} SERS adopted pay-as-you-go financing of healthcare beginning in fiscal year 1995.

Statement of Actuary (Continued)

Short-Term Solvency Test

The SERS financing objective is to pay for the benefits through contributions that remain approximately level from year to year as a percent of member payroll.

If the contributions to the System are level in concept and soundly executed, the System will pay all promised benefits when due - the ultimate test of financial soundness. Testing for level contribution rates is the long-term test.

A short-term solvency test is one means of checking a system's progress under its funding program. In a short-term solvency test, the plan's present assets (cash and investments) are compared with:

1) Active member contributions on deposit;

- 2) The liabilities for future benefits to present retired lives;
- 3) The liabilities for service already rendered by active members.

In a system that has been following the discipline of level percent of payroll financing, the liabilities for active member contributions on deposit (liability 1) and the liabilities for future benefits to present retired lives (liability 2) will be fully covered by present assets (except in rare circumstances). In addition, the liabilities for service already rendered by active members (liability 3) will be partially covered by the remainder of present assets. The larger the funded portion of liability 3, the stronger the condition of the system. Liability 3 being fully funded is rare.

^{*} Final average salary is presented on a monthly basis for ease of comparison.

Purpose

The School Employees Retirement System of Ohio was established in 1937 by the state legislature to provide retirement and disability benefits for all non-certificated persons employed by the state's 745 school districts. This purpose is sustained by the member and employer contributions and the income realized from investment of those contributions.

Administration

The functioning of SERS is supervised by a seven member Board which works in conjunction with the System's Executive Director. Four of the seven Board members are elected by the general membership (those who contribute to SERS) and one is elected by retirees. The Ohio Attorney General and State Auditor, by virtue of their elected office, serve as the remaining two Board members in an ex officio capacity.

The Executive Director is appointed by the Board. This person oversees the administrative operation of the System, and is aided by four directors. Their areas of responsibility are finance, investments, member services, and management information services.

Employer Participation

The school employers served by SERS include public schools within the state's cities, villages and counties, as well as local districts, vocational and technical schools, and The University of Akron.

Employers contribute to SERS at the rate of 14.0% of payroll. Some employers pay the System directly on a monthly, quarterly, or annual basis, while others make payments through participation in the Ohio Department of Education's School Foundation Fund.

In addition to forwarding appropriate contribution amounts to SERS, it is the responsibility of the employers to supply SERS with new membership records, members' contribution information, and any data needed at the time of a member's application for benefits or refund of deposits on termination of employment.

Employee Participation

Membership in SERS is divided into several groups based on the activity of a member's SERS account. Member groups are:

- A. Active Members These are persons currently employed by a school employer. Membership is required for most employees working in a position that does not require certification by the Ohio Department of Education. These persons include clerical workers, maintenance personnel, bus drivers, food service workers, playground supervisors, data processing personnel, etc. Two exceptions to the membership requirements are: (1) persons with student status within a school district may choose to become members of SERS; and (2) temporary employees for emergency purposes. Active members have an amount equal to 9.0% of their earnings deducted from their gross salaries for each payroll period. These amounts are then forwarded to SERS by the payroll officer and applied to the member's account at SERS.
- B. Inactive Members These are persons who have contributions on deposit with SERS, but are not currently employed by a school district in the state of Ohio.
- C. Retired/Disabled Members These are persons who have either (1) met the age and service requirements for retirement from service; or (2) become eligible to receive benefits as a result of an injury or illness that prevents the member from performing regularly assigned duties.
- D. Member's Survivors When a member dies before retirement, the qualified beneficiaries become eligible for monthly benefits from SERS.

Refund of Contributions

A member is entitled to a full refund of contributions with SERS upon termination of school employment. Only the money the member has contributed is refundable.

In accordance with the Ohio Revised Code, there is a 90-day waiting period after the member's last day of service

before the refund can be paid. A refund cancels any claim to benefits offered by SERS.

The refunded amount, plus interest, may be redeposited if, at some later date, the member returns to school service or to any other public service with the state of Ohio. This purchase may be made after the member has been credited with 1.5 years of contributing service.

Service Retirement

Members may retire from school employment if they have attained one of three combinations of age or service:

- 1. Five years of service and age 60; or
- 2. Twenty-five years of service and age 55; or
- 3. Thirty years of service at any age.

A member's age is defined to be the actual age a person has reached on the day of retirement. Any change of the date of birth on our records must be substantiated by submitting proof of date of birth to the System.

Service Credit

Service credit is the actual number of years or fraction thereof a person worked within a school district or districts in Ohio schools, plus any other free or purchased service the System recognizes.

Free service is service for which no contributions are required. This includes military service performed while on leave from the school district; service with a school system before establishment of SERS in 1937; or service granted for a period (three years or less) spent off the district's payroll while drawing state worker's compensation for a school job-related accident.

Purchased service is service for which payment plus interest is required. The interest rate is 7.5%. Service must be purchased before the date of retirement if it is to be considered in calculating the member's benefits. Payment may be made in a lump sum or in multiples of one month or more so long as the complete amount due is tendered before retirement. The types of service that can be purchased are:

Military - A member may purchase up to five years of credit in SERS for active service in the armed forces of the U.S. There is no restriction placed on time elapsed between school employment and the time spent in the military. A member may purchase additional service credit if the military service includes prisoner of war time. Purchased credit may not be greater than the member's actual Ohio school employment credit.

Federal, Other State, or School Service - The member may purchase credit for service rendered in a school or government position outside the State of Ohio. The service cannot be greater than the member's SERS service nor can it exceed five years.

Refunded Service - Service lost due to the payment of a refund may be restored after the member has returned to work and accrued 1.5 years of service covered by SERS, STRS, PERS, PFDPF, or SHPRS. An interest charge is payable in addition to the restored funds.

Compulsory Service - This is service for which the member should have made contributions while working, but did not, for whatever reason. The full amount, plus interest, must be paid before retirement benefits are granted.

Optional Service - This is service during a period when the member was given a choice of contributing or refraining from doing so. The member must pay back contributions and may be responsible for the employer's share.

Leave of Absence - A member returning to work after a period of authorized leave may purchase service credit for the period involved. An employer contribution is required for this service to be granted, but the employer is under no obligation to make payment.

A member who has contributions not only at SERS, but also at State Teachers (STRS) or Public Employees (PERS) Retirement Systems is eligible to receive transferred credit from either or both of those systems. Any service which is not concurrent with (served at the same time as) SERS service will be included in determination of retirement benefits.

Early Retirement Credit

Employers may purchase up to five years of service credit for their eligible employees under an early retirement incentive plan authorized by 1983 legislation.

Adoption of a plan is optional and only employers may purchase up to five years of such credit.

Benefit Calculation

The final average salary is the average of the member's highest three years of earnings while in the school service.

The benefit amount is calculated in this way:

The final average salary amount is multiplied by 2.1% to determine the value of a year of service credit. This value cannot be less than \$86. If it is, \$86 is used. The value is then multiplied by the number of years of service credit. This calculation yields the annual retirement benefit amount for a person who has service at retirement time.

For "early retirement" (the member is under age 65 or has less than 30 years of service) there is a corresponding percentage of decrease in the required benefit amount to allow for an extended period of retirement. Reduction factors are required by Ohio state law.

Retirement Options

Should the retiring member wish to provide a benefit amount for a beneficiary upon the retiree's death, this may be done by the selection of one of the optional retirement plans provided for this purpose. Optional plans may be altered by the retired member should the beneficiary die before the retiree or in the event of a divorce, with consent of the ex-spouse or a court order.

Disability Retirement

A member prevented from performing regular duties on the job after incurring an injury or illness may apply for monthly disability benefits. To qualify, the member must have at least 5 years of service credit. In addition to the age and service requirements, the member must:

- Have developed the disabling illness or injury after last becoming a member of SERS;
- Have been recommended for approval by a SERS-sponsored medical review board;
- Have applied for benefits within 2 years of the last day of service with the school district;
- Not have withdrawn contributions or retired on service retirement.

There are two disability plans with differing benefits. All new members are under the new plan. Benefits range from 30% of final average salary to 75%. Benefits are lifetime under the old plan, subject to re-examination; and may be converted to service retirement under the new plan.

Death Benefits

The designated beneficiary of any SERS retirees will receive a \$500 lump sum payment upon the retiree's death. If there is no beneficiary, payment is made to the person responsible for the burial expenses or to the retiree's estate.

Survivor Benefits

Qualified dependents of a deceased member may apply for monthly survivor benefits. Such benefits are payable if the member had at least 18 months of Ohio service credit, three of which were served in the 2.5 years prior to the member's death, or if the member was receiving a disability benefit.

If the member was eligible for service retirement but had not yet applied for benefits, the surviving spouse or other single dependent beneficiary of any age can draw a monthly lifetime benefit known as the joint survivor option. Duration of survivor benefits depends primarily on the age and marital status of the dependent(s).

Health Care and Other Benefits

Eligible benefit recipients receive medical insurance from SERS. Coverage for a spouse and/or dependent children can be provided by means of a monthly deduction from the benefit. Coverage is offered by the selection of the Aetna insurance company or HMO's available in certain zip codes.

If the benefit recipient participates in Medicare B, SERS reimburses the recipient \$24.80 per month.

A prescription drug program is available to benefit recipients of SERS and their dependents who are covered under one of the health plans. Participants may either choose to obtain prescription drugs from a participating local pharmacy and pay 20% of the cost or they may elect to receive the drugs by mail from a licensed mail order pharmacy for a minimal fee per medication.

Members retiring after June 1, 1986 must have 10 or more years of service credit to qualify for the health care benefits.

Members retiring on and after August 1, 1989 with less

than 25 years of qualified service credit pay a portion of their premium for health care. The portion is based on years of service up to a maximum of 75% of the premium. Members who joined SERS on and after July 1, 1993 pay the full premium until eligible for Medicare.

Cost of Living Increases

After 12 months on the benefit rolls, and each year thereafter, SERS retirees are entitled to an automatic cost of living increase of up to 3%, based on the Consumer Price Index. In addition, the legislature has granted several permanent ad hoc increases to SERS retirees, the last such increase being in 1988.

Re-Employed Retirees' Annuity

Ohio public system retirees who work in a SERS covered position are entitled to an annuity at age 65. The annuity is based on a money purchase formula and may be paid in monthly payments if the monthly amount is \$25 or more. If the monthly amount is less than \$25, the annuity will be paid in a lump sum.
